Attachments: Allotment tree positions.png

Hi Jo,

I've attached a highlighted map of my allotment plot with numbers showing the positions of the proposed fruit trees. Details below.

1. 2yo bare root Red Fallstaff apple tree on M9 dwarf rootstock. Max height - 3m.
2. 3yo bare root Lapin cherry tree on Colt rootstock. Max height - 3m
3. 2yo bare root Jubilee plum on St Julien rootstock. Max height - 3m.
4. 2yo bare root Bramley apple on M9 dwarf rootstock. Max height - 3m.

I've carefully placed the trees as to not overshadow either the neighbouring plot or the existing beds on my plot. I hope this is ok!

Kind regards,

Sam Lincoln

Hi Sam

As per our allotment policy, this will need approval from the Parish Council.

Please can you highlight on a map their position, as well as details about the trees. Please can I have this info before 26th Nov to present to Council.

Thanks

Jo

Subject: Fruit Trees

Hi Jo,

I hope you are well. I'm looking to plant some fruit trees on my allotment plot this winter. Two apple trees, a plum and a cherry. They would all be on dwarf root stock and kept pruned within 3 metres. Would this be OK?

Thanks,

Sam Lincoln
