Stonehouse Community Council have a number of questions regarding the proposal for the Kear Campus Replacement which was recently agreed by the Executive committee, publicised in the council's magazine and social media outlets. We would appreciate if you could provide this information. Please note that a separate request was made to Tony McDaid for some of these items.

- What criteria was used to score the potential sites and can this Criteria and scoring made be provided to Stonehouse community council
- Do The council have a concept design or footprint that can be provided to the CC or an outline specification that will be used for the procurement of the facility. Can this be provided to the CC.
- What additional papers or presentations were made to elected members on this subject prior to the executive committee and on what dates were these made and who was in attendance
- Can you provide a copy of the The Feasibility study carried out in 2019 to identify the unique requirements of SEBN.
- What transport assessments have been carried out regards ferrying in pupils to a replacement school and can copies be provided.
- What land surveys have been carried out i.e. contamination / mining at the proposed Union Street site and can copies of the reports be provided?
