<b>Appendix 7 List of Key Strategies and Plans</b> .....	<b>67</b>

## 1 Preface

**1.1** The South Lanarkshire Local Development Plan sets out a framework for pursuing the continued growth and regeneration of South Lanarkshire by seeking sustainable development in an improved urban and rural environment. South Lanarkshire already has the benefit of good transport links, access to a major population base and markets, a wide range of housing, industrial, and commercial sites and access to recreational facilities. The Local Development Plan provides an opportunity to build on these advantages by encouraging the development of sites that will benefit our community and safeguard our environment, making South Lanarkshire a place in which people will want to live, work and invest.

### **Cllr. Hugh Dunsmuir Chair of Planning Committee**

**1.2** The South Lanarkshire Local Development Plan sets out the vision, objectives and strategy which will be used to guide future development proposals. Building on the principles established in the current local plan this new local development plan is aimed at generating economic growth and promoting South Lanarkshire as a place in which to live and do business. The plan continues to promote Community Growth Areas, Development Framework and Masterplan sites. In addition the plan identifies a number of new proposals which seek to provide a greater range and choice for housing to add flexibility to the land supply. The plan redesignates a number of industrial sites that are no longer attractive to investors. The local development plan also highlights that the area potentially suitable for windfarms has been reduced based on the impact of consented and built windfarms. Overall, the plan remains focused on the vision set in the Council Plan 'Connect' 'to improve the quality of life for everyone in South Lanarkshire'.

### **Colin McDowall, Executive Director, Community and Enterprise Resources**

## Profile of South Lanarkshire

**2.1** With 314,000 residents (2011 census) and 138,196 households (2011 National Records of Scotland estimate), the population of South Lanarkshire (SL) continues to grow. In terms of population, it is Scotland's fifth largest local authority - after Glasgow, Edinburgh, Fife and North Lanarkshire. It covers an area of 1,772 square kilometres, from Rutherglen and Cambuslang, on the boundary with Glasgow, to the Southern Uplands at Leadhills and east to Forth and Dolphinton. Within its boundaries there are 30 Conservation Areas, around 1,100 Listed Buildings and an extensive rural area which includes the Clyde and Avon Valleys and parts of the Southern Uplands and the Pentland Hills.

**2.2** The M74 running north to south through South Lanarkshire and the A725, A71, A70 and A702, all running east to west, provide effective road links between the towns, villages and communities. These are complemented by an extensive rail network, with services from Glasgow to Hamilton, East Kilbride, Rutherglen, Cambuslang and Lanark town centres, which are a focus of retail, leisure, commercial, civic, educational and health facilities.

**2.3** The construction of new houses has continued with over 4,800 built between 2008 and 2012. This has been complemented by private sector investment in new commercial and industrial development and by Council investment in community infrastructure. The latter includes the schools modernisation, roads and transportation and housing investment programmes. The schools modernisation programme alone has already delivered 17 new or refurbished secondary schools and will see 124 new or refurbished primary schools completed by 2018. In addition new commercial and industrial investment has taken place in strategic industrial and business locations such as Hamilton International Technology Park (HITP) plus new retail developments in Strathaven, Larkhall, Lesmahagow and Carluke.

**2.4** In common with other areas there have been significant job losses in South Lanarkshire over the last five years. However, it is anticipated the number of jobs will grow by 2,500 over the next 10 years. A focus for some of the investment needed to generate these jobs will be in Clyde Gateway, Hamilton International Technology Park and Peel Park, East Kilbride. Clyde Gateway is identified in the National Planning Framework 2 (NPF2) as the number one regeneration priority in Scotland.

**2.5** The Council recognises that it has to respond to the challenges presented by its ageing population, the growing number of households requiring accommodation, the need to stimulate economic activity and create employment. Whilst, at the same time, consider the impact of climate change and the need to protect and enhance the areas natural and built environment.

**2.6** The above provides the physical, economic and social context within which a vision for the South Lanarkshire Local Development Plan (SLLDP) can be developed and realised. This vision is ambitious but soundly based on the opportunities and the benefits offered by South Lanarkshire and its communities; using these to address the forthcoming challenges and promote the area as a place in which to invest, live and work.

## Policy Context

**2.7** The Council has a statutory duty under the Planning etc. (Scotland) Act 2006 to prepare a local development plan. This must contain the planning policies which provide the basis for assessing and determining planning applications and which guide and shape future land use. The LDP is one tier in the hierarchy of plans that will set out planning policy for the Council.

**2.8** At the top level lies the Government Economic Strategy the National Planning Framework 2 (NPF2) and Scottish Planning Policy (SPP). NPF2 highlights the importance of place, it identifies where the national

## 2 Introduction

priorities for investment should take place to support the core aim in the Government's Economic Strategy for sustainable economic growth. SPP focuses on how development should be delivered if this aim is to be satisfied.

**2.9** The Glasgow and the Clyde Valley Strategic Development Plan (GCVSDP) provides the strategic context for development in the wider city-region. The GCVSDP is aimed at supporting economic competitiveness and social cohesion whilst acknowledging the need to adopt a sustainable environmental approach.

**2.10** The Council Plan, 'Connect', sets out what the Council aims to achieve between 2012 to 2017. Its overarching vision is to 'improve the quality of life for everyone in South Lanarkshire'. The plan identifies a range of objectives aimed at working towards this vision.

**2.11** Several of these objectives are in the process of being, or have already been, addressed in a range of plans and strategies. This includes the Single Outcome Agreement, the Community Plan, the Local Transport Strategy (LTS), the Local Housing Strategy (LHS) and the emerging Economic Strategy. These all provide context for the preparation of the SLLDP.

**2.12** The Council is obliged to have a new South Lanarkshire Local Development Plan (SLLDP) in place within two years of the Strategic Development Plan (SDP) for Glasgow and the Clyde Valley being approved. The SDP was approved in May 2012 and therefore the SLLDP must be adopted by May 2014.

**2.13** The SLLDP has a specific role to play in supporting a number of 'Connect' objectives. In particular it should:-

- Support the local economy
- Develop a sustainable Council
- Improve the quality of the physical environment

- Improve the road network
- Improve the quality, access and availability of housing

**2.14** The aim, vision, themes, objectives and spatial strategy of the proposed SLLDP must be based in and acknowledge the approach and direction taken in these supporting plans, policies and strategies. This legislative and policy context is outlined in Figure 2.1 and a list is included in Appendix 7.

Figure 2.1 Legislative and policy context

**2.15** Under the terms of Section 22 of the Planning etc. (Scotland) Act 2006 Supplementary Guidance (SG) will be produced on a number of topics. These will form part of the Local Development Plan. Supplementary Guidance contains more detailed information and policies

allowing the SLLDP to focus on key policies and proposals. Any approved Supplementary Guidance will be a material consideration in the determination of planning applications until such time as the Local Development Plan is adopted. Thereafter it will form an integral part of the Local Development Plan for South Lanarkshire.

**2.16** Supplementary Guidance on Development Management, Place Making and Design and Wind Energy has been produced alongside the SLLDP. Further supplementary guidance is currently being produced on;

- Green Belt and Rural Areas
- Natural and Historic Environment
- Environment (including Climate Change)
- Community Infrastructure Assessment
- Affordable Housing and Housing Choice
- Industrial, Commercial and Retail Development
- Green Network and Greenspace

**2.17** Full details of the programme for production of these supplementary guidance documents can be found in the South Lanarkshire Development Plan Scheme. (INSERT HYPERLINK HERE)

**2.18** Issues relating solely to minerals development are not contained within the proposed SLLDP. These are contained in a separate Minerals Local Development Plan (MLDP) adopted in June 2012.

### Technical Studies

**2.19** Technical studies have been used to inform preparation of the proposed SLLDP.

- **Strategic Environmental Assessment:** The SLLDP is subject to the Environmental Assessment (Scotland) Act 2005. This requires the Strategic Environmental Assessment (SEA) of all public sector policies, plans, programmes and strategies. This required the

preparation of an Environmental Report (ER) to accompany the Main Issues Report (MIR). Both the ER and MIR have been the subject of consultation. The SLLDP itself is accompanied by an annex to the ER which evaluates the potential environmental effects of the plan. The preparation of the ER annex has influenced the development of the SLLDP.

- **Habitats Regulations Appraisal:** A report has been prepared which presents the Habitats Regulations Appraisal (HRA) Record for the SLLDP. This was undertaken in compliance with the EC Habitats Directive (Council Directive 92/43/EEC) and the Conservation (Natural Habitats, &c.) Regulations 1994 as amended. The HRA concludes that there are no likely significant effects from this SLLDP on Natura 2000 sites in the area.
- **Equalities Impact Assessment:** A full equalities impact assessment (EqIA) of the proposed plan has been carried out. This concluded that there are no adverse impacts in terms of equalities legislation or on community relations.
- **South Lanarkshire Local Landscape Character Assessment (LCA):** This was approved by South Lanarkshire Council and updates the 1999 Glasgow and the Clyde Valley Regional LCA and provides greater detail on the local landscape character. This was used to inform the preparation of the document entitled 'Validating Local Landscape Designations'.
- **Validating Local Landscape Designations:** This draws on the South Lanarkshire LCA to review the extensive local landscape designations in the SLLP as advocated by Scottish Natural Heritage and Historic Scotland in 'Guidance on Local Landscape Designations (2005)'. The designations have been updated to focus on the areas of highest landscape quality and value in South Lanarkshire. The document identifies six Special Landscape Areas (SLAs) in South Lanarkshire. This document was approved by South Lanarkshire Council and these designations remain relevant.

## 2 Introduction

- Spatial Framework and Landscape Capacity for Wind Turbines update 2013 Technical Report:** This technical report updates the spatial framework for windfarms set out in the Supplementary Planning Guidance produced on Renewable Energy in 2010. Taking account of development proposals which have occurred since 2010, it reviews the Broad Areas of Search for windfarms and the areas constrained by cumulative impact. It should be read in conjunction with the 2010 reports 'Spatial Framework and Landscape Capacity for Windfarms', 'Validating Local Landscape Designations' and 'South Lanarkshire Local Landscape Character Assessment'. These documents combined with the 2013 update on Landscape Capacity for Windfarms provide the basis for making a technical assessment of the sensitivity and capacity of the various landscape character types in South Lanarkshire to accommodate windfarm and turbine development.
- Call for Sites Assessment Technical Report:** Prior to publication of the MIR interested parties were invited to put forward sites they considered should be included as development opportunities in the proposed SLLDP. The sites were assessed against a number of factors including landscape, environmental impact, infrastructure, flood risk and accessibility. The sites were also subject to SEA. The technical report outlines this process and the results of the site assessment.
- Housing Technical Report:** This considers the findings of the Housing Need and Demand Assessment (HNDA), prepared as part of the process for the GCVSDP and how this translates into the housing requirement in the LDP. It also considers the effectiveness of sites contained in the housing land audit, any shortfall or surplus in land supply and comments on the affordable housing agenda.
- Industrial, Commercial and Retail Development Technical Report:** This considers a number of matters related to the economy section of the SLLDP. In particular it considers the different types of employment land found across South Lanarkshire and whether the current designation of these sites is still relevant. Additionally

it looks at the retail areas and suggests changes to the boundaries of a number of these areas. Furthermore, findings from the economic outlook and scenarios report (Oxford Economics: The Strategic and Economic Implications of the Recession for Scotland, May 2009) prepared to inform the SDP have been taken into account in developing the SLLDP. Further details are included within the technical report.

### How to Use the Plan

**2.20** Every part of South Lanarkshire is covered by a land use policy. Depending on the location and nature of a particular proposal, applicants, stakeholders and other interested parties, should consider the South Lanarkshire Local Plan (SLLP), the MLDP and the proposed SLLDP. The adopted SLLP will remain in place until the SLLDP is formally adopted by the Council. It should also be noted that more than one policy may apply to a particular area.

**2.21** In order to determine which policies or proposals are relevant the following steps should be taken:

- Identify the property or land on the proposals maps.
- Note the colour, lines or symbols and the policy or proposal reference which covers the land or property.
- Compare these to the symbols on the plan key and this will indicate which policy or proposal affects the property or land.
- Locate the relevant policy or proposal within the spatial strategy document.

**2.22** Some policies are not site specific, for example, Community Infrastructure Assessment or Development Management; in this case the policy applies to all development proposals, as appropriate.

## How to Comment

**2.23** Representations can be made either on the Council's website [www.southlanarkshire.gov.uk](http://www.southlanarkshire.gov.uk) following the links to the Local Development Plan from the planning pages (this is the preferred method) or by completing a representation form available from:

Planning and Building Standards Headquarters  
Community and Enterprise Resources  
South Lanarkshire Council

## Vision and Strategy 3

### Vision and Spatial Strategy

**3.1** The SLLDP seeks to ensure that future development takes place in a sustainable way. At the same time it must recognise the need for economic growth and regeneration. Together this must create well designed and located places and respect the distinctive and valued qualities of the area's natural and built environment.

**3.2** The Plan's overall strategic vision is:-

'To promote the continued growth and regeneration of South Lanarkshire by seeking sustainable economic and social development within a low carbon economy whilst protecting and enhancing the environment'

**3.3** The SLLDP has to demonstrate how the Council can work towards achieving this vision by identifying appropriate, detailed and specific land use related objectives. Four distinctive themes were identified during the initial consultation stage around which the Plan's objectives could be structured and developed:-

- Economy and Regeneration
- People and Places
- Environment
- Infrastructure

**3.4** This initially provided the basis for identifying 4 broad objectives which seek to:-

- Encourage sustainable economic growth
- Meet the communities needs

- Enhance and safeguard the environment
- Maximise the use of existing infrastructure

**3.5** These in turn have been used to develop the more specific and focused objectives described in Figure 3.1.

**3.6** If progress is to be made in achieving these objectives, the Plan has to encourage development in the right place, at the right time and of the right quality. Consequently, the spatial implications of these objectives and the development opportunities they generate together make up the spatial strategy for the Plan. The individual components of the spatial strategy are described in Figure 3 along with the overall relationship between the Plan's vision, themes, objectives and spatial strategy, set against a background of considering impacts on climate change. This sets the overall strategy of the SLLDP.

**3.7** In addition the Plan must reflect the policy approach and direction taken in the GCVSDP. It identifies sites which can operate as Strategic Economic Investment Locations (SEILs) and a network of Strategic Town Centres which support a range of economic, civic and social functions. Encouraging and facilitating the role of the SEILs and the Town Centres will contribute towards meeting the vision and objectives of the SLLDP.

**3.8** The location and nature of the regeneration and growth priorities identified in the SLLP also broadly support the vision, aims and objectives and spatial strategy of the plan. They therefore merit being carried forward into the SLLDP. In particular, the community growth areas and development framework sites will continue to play a significant role in achieving the Plan's vision and objectives.

**3.9** The SLLP also identified residential and retail masterplan sites and green network priorities. The location and purpose of these remain relevant to achieving the vision and objectives of the SLLDP. Taken together, appropriate developments within the SEILs, Town Centres, masterplan sites, community growth areas and development framework

### 3 Vision and Strategy

sites would accord with the Plan's vision and contribute towards achieving its objectives. Therefore they represent a significant component of the Plan's spatial strategy and are included in the Plan's development priorities, (Table 3.1 and Appendix 3) while the Council's commitment to the green network priorities is re-affirmed in Policy 14.

**3.10** Sites that are considered appropriate for development in this plan are indicated on the strategy and settlement plans as development proposals. These proposals represent changes in the land use designation from the adopted South Lanarkshire Local Plan. Each of the proposals is described in more detail in the Technical Reports that accompany this document. Other development proposals which come forward and whose location and nature accord with the policies and proposals in this plan would similarly accord with the Plan's vision, contribute towards achieving its objectives and become components of its spatial strategy.

**3.11** The policies and proposals which will be used to assess and determine if other development proposals will contribute towards achieving the Plan's objectives and thus secure the preferred land use outcomes described in the spatial strategy, are set out under the relevant theme. Some of these policies and proposals cut across all the themes. In view of their wider, more strategic implications these are described in this section, dealing with the overall strategy and include:

- Spatial Strategy
- Climate Change
- Green Belt and Rural area
- Development Management and Place Making
- Community Infrastructure Assessment
- General Urban Areas/Settlements.

#### Policy 1 Spatial Strategy

The South Lanarkshire Local Development Plan will encourage sustainable economic growth and regeneration, protect and enhance the built and natural environment and move towards a low carbon economy. This will be achieved by;

- supporting regeneration activities and maximising regeneration and local economic benefits
- delivery of the development proposals identified in Table 3.1 and Appendix 3
- development that accords with and supports the policies and proposals in the development plan and supplementary guidance.

Table 3.1 : Spatial Strategy Development Priorities (full details contained in Appendix 3)

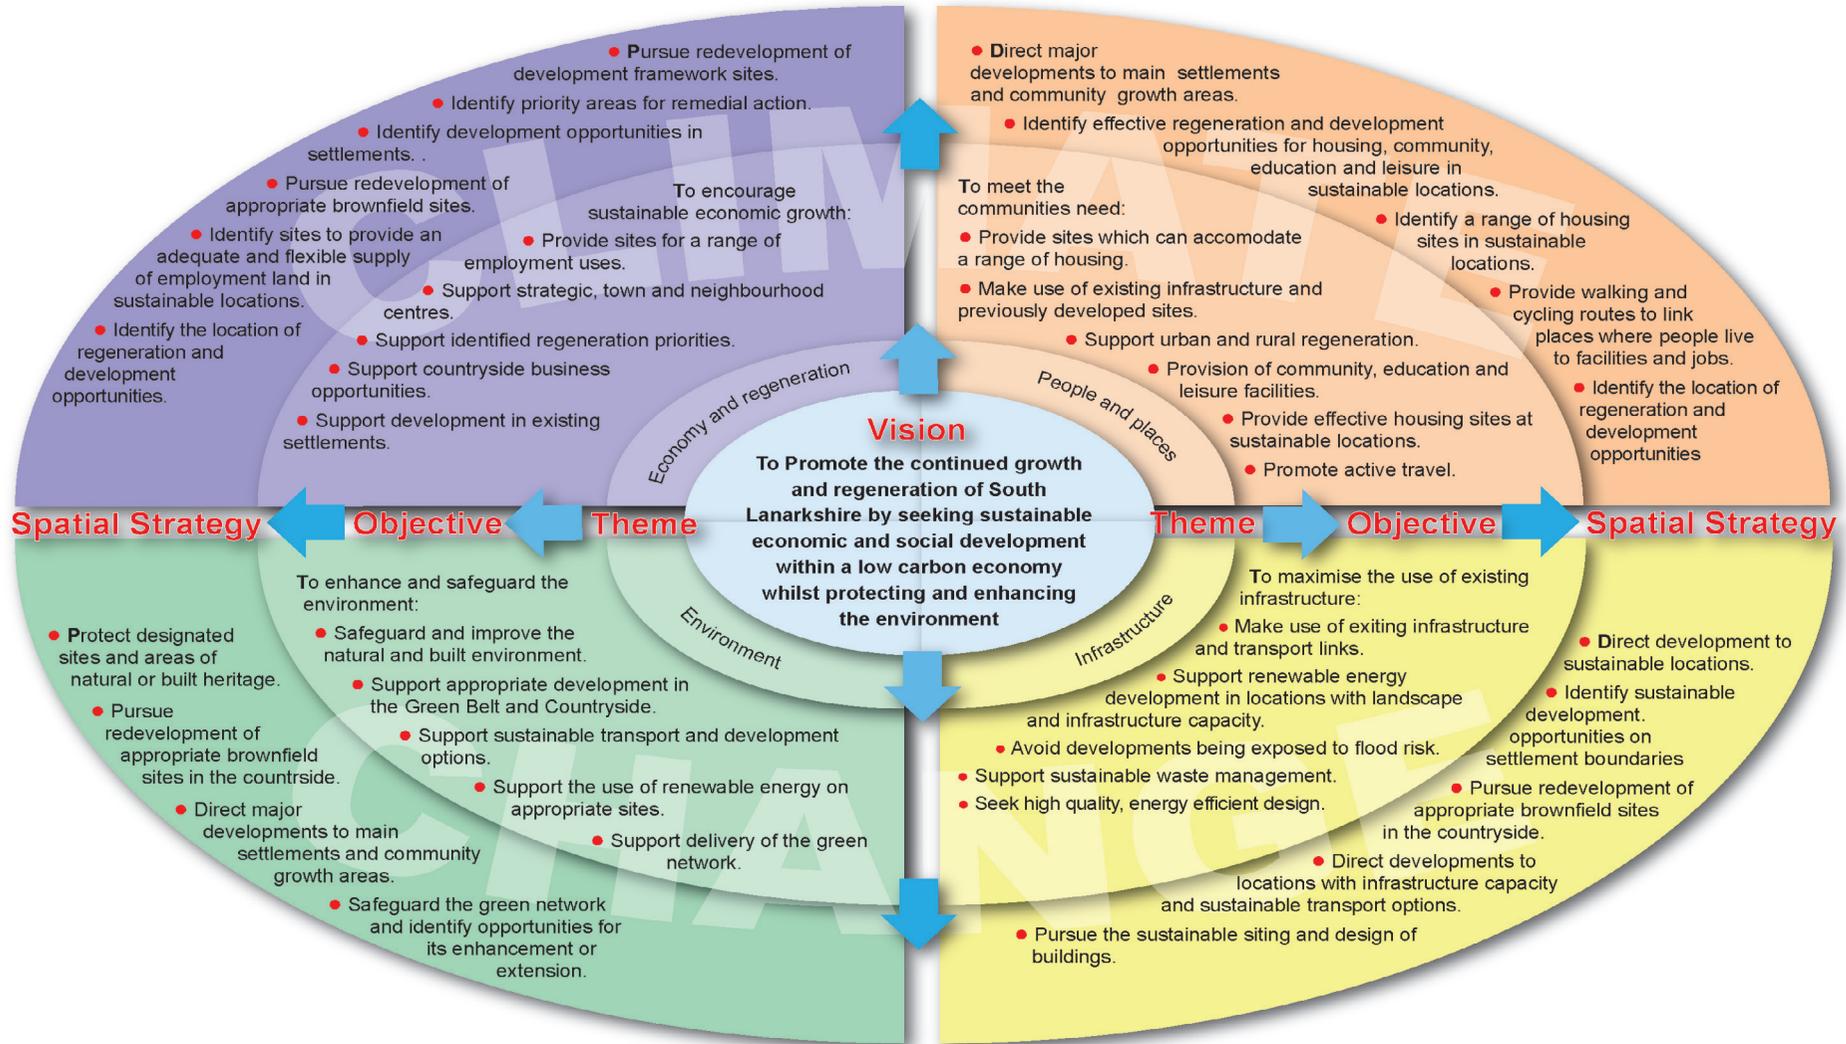

Category	Location

### 3 Vision and Strategy

Figure 3.1 Vision and Spatial Strategy

## Vision and Strategy 3

### Climate Change

**3.12** A key theme running through the SLLDP is the need to address the land use issues arising from the impact of climate change. In particular the SLLDP aims to address climate change issues outlined in the Council's Sustainable Development Strategy and the Carbon Management Plan and to comply with the need to reduce carbon dioxide emissions from new buildings. These aims, where appropriate, translate into policies and proposals which:-

- ensure development is sustainably located such that it makes best use of public transport and the established social and economic infrastructure and has no significant adverse impacts on the environment;
- makes new buildings as carbon neutral as possible;
- safeguards and enhances green networks;
- reduces waste;
- reduces South Lanarkshire's reliance on fossil fuels; and,
- supports the use of renewable, low and zero carbon energy generating technologies.

**3.13** The SLLDP must also reflect the need to support development that will help to meet the Scottish Government's target of generating the equivalent of 50% of Scotland's electricity demand from renewable resources by 2015, 100% by 2020 and the equivalent of 11% of heat demand from renewable sources by 2020. The policy consequences for the Council of these requirements are dealt with in the section on Renewable Energy and in Supplementary Guidance.

**3.14** Consequently, the plan across its vision, themes, objectives and spatial strategy recognises the need for the location and design of new developments to respond and adapt to meet the challenges of climate change whilst having regard to the need to pursue growth and regeneration.

### Policy 2 Climate Change

Proposals for new development must, where possible, seek to minimise and mitigate against the effects of climate change by;

- i. being sustainably located;
- ii. maximising the reuse of vacant and derelict land;
- iii. utilising renewable energy sources;
- iv. being designed to be as carbon neutral as possible;
- v. using, where appropriate, low and zero carbon energy generating technologies, that reduce predicted carbon dioxide emissions by at least 15% below 2007 building standards within new buildings;
- vi. avoiding areas of medium to high flood risk;
- vii. having no significant adverse impacts on the water and soils environment, air quality, biodiversity and green networks;
- viii. ensuring new development includes opportunities for creation and enhancement of green networks,
- ix. providing electric vehicle recharging infrastructure in new developments to encourage the adoption of low carbon vehicles; and
- x. minimising waste.

Development proposals must also accord with other relevant policies and proposals in the development plan and other appropriate supplementary guidance.

### Green Belt and Rural Area

**3.15** The Green Belt is a national, strategic and local resource. Within South Lanarkshire the Green Belt encloses the urban settlements of Cambuslang, Rutherglen, East Kilbride, Strathaven, Hamilton, Bothwell,

## 3 Vision and Strategy

Uddingston, Blantyre, Larkhall, Stonehouse and Carluke. This area is well served by a range of services and has high levels of road and rail connectivity. Consequently, there is continued pressure for development, particularly on the edges of the established urban centres. The settlement boundaries have been reviewed to take account of new, consented development or to allow for the limited release of sites, identified through the local development plan process, whose development can contribute towards economic growth. Sites have been selected with due regard to identifying locations that are sustainable and have a limited impact on the environment.

**3.16** Beyond the Green Belt the remainder of South Lanarkshire is more rural with a dispersed settlement pattern. Pressure for housing development remains high, particularly where there are reasonable road connections via the A702 or on locations that are accessible to the M74. The focus of this plan is on supporting existing communities by directing development towards them and ensuring that the identity of these small settlements is not lost. Consideration may also be given to limited settlement expansion, of an appropriate scale, which supports and encourages prosperous and sustainable communities within the rural area.

**3.17** The aim of the SLLDP is to control development in the Green Belt and rural area and ensure there is no significant and adverse impact on the environment or on local services and infrastructure.

### Policy 3 Green Belt and Rural Area

The Green Belt and the Rural Area functions primarily for agriculture, forestry, recreation and other uses appropriate to the countryside. Development which does not require to locate in the countryside

will be expected to be accommodated within the settlements identified on the proposals map, other than in the following circumstances;

- i. Where it is demonstrated that there is a specific locational requirement and established need for a proposal.
- ii. The proposal involves the redevelopment of derelict or redundant land and buildings where significant environmental improvement can be shown.
- iii. The proposal is for conversion of traditional buildings and those of a local vernacular.
- iv. The proposal is for limited development within clearly identifiable infill, gap sites and existing building groups.
- v. The proposal is for extension of existing premises or uses providing it is of a suitable scale and design. Any new built form should be ancillary to the main use.

In the rural area limited expansion of an existing settlement may be appropriate where the proposal is proportionate to the scale and built form of the settlement, it is supportive of the sustainability of the settlement and a defensible settlement boundary is maintained.

In both the Green Belt and rural area isolated and sporadic development will not be supported.

Development proposals must also accord with other relevant policies and proposals in the development plan and other appropriate supplementary guidance. Appropriate uses in the Green Belt and rural area are contained within supplementary guidance.

## Vision and Strategy 3

### Development Management and Place Making

**3.18** The development management process has a key role in encouraging the creation of attractive, sustainable places that are socially and economically successful. The Council expects developers to respond to this challenge and contribute towards improving the quality of our towns, buildings and spaces. The LDP and its associated Supplementary Guidance sets out the approach the Council will expect developers to adopt when planning and designing new developments. This approach is based on the policies contained in the National Planning Framework 2, Scottish Planning Policy, Designing Places, Designing Streets and the Glasgow and the Clyde Valley Strategic Development Plan.

**3.19** The Plan and the associated guidance clearly sets out how the Council will assess and determine planning applications and is aimed at providing applicants with the certainty they need when they are preparing plans for new developments. This can reduce the risk to developers during the design process and encourage them to support innovative and imaginative design solutions.

**3.20** At a detailed level, supplementary guidance on Development Management, Place Making and Design (DMPDSG) provides information on the criteria used when the types of planning application made by a homeowner, such as extensions, are being considered. It also provides information on the criteria used to assess proposals for hot-food shops, advertisement hoardings, working from home, mobile snack vans, tourist related developments, Gypsies/Travellers and Occupational Travellers sites and the electronic communications network. It also provides specific requirements for development within urban areas, residential development guidance and guidance on design and access.

### Place Making

**3.21** The Council expects the design and layout of new developments to create buildings and places which respect their surroundings, establishes a sense of place and identity, contributes positively towards the existing character of an area, are easy to get to and move around in, particularly for pedestrians, and incorporates the principles of sustainable development.

**3.22** In addition the siting, design and layout of developments, including community growth areas, development framework sites and residential masterplan sites, should accord with the principles of place making. This requires them to demonstrate an understanding of landscape setting and context, reinforce the character and settlement patterns of local areas, contribute to a sense of place and have an understanding of local building traditions and materials. Guidance on design, including successful place making is provided in the DMPDSG.

**3.23** The outcome should be the creation of valued and appreciated places people can identify with, which can integrate the activities and services used by their community and where people will want to live, work, visit and enjoy. This will help communities fulfil their economic and social potential.

### Policy 4 Development Management and Place Making

All development proposals will require to take account of and be integrated with the local context and built form. Development proposals should have no significant adverse impacts on the local community and where appropriate should include measures to enhance the environment as well as address the six qualities of place making (as detailed in Appendix 1 of the DMPDSG).

## 3 Vision and Strategy

When assessing development proposals, the Council will ensure that:-

- i. there is no significant adverse impact on adjacent buildings or streetscape in terms of layout, scale, massing, design, external materials or amenity;
- ii. there is no significant adverse impact on landscape character, built heritage, habitats or species including Natura 2000 sites and Protected Species nor on amenity as a result of light, noise, odours, dust or particulates;
- iii. the proposed development is accessible for all, provides suitable access and parking, encourages active travel and has no adverse implications for public safety;
- iv. the proposal includes appropriate integrated and accessible infrastructure, open space, green infrastructure and landscape provision;
- v. sustainability issues are addressed through energy efficient design, layout, site orientation and building practices;
- vi. the development does not result in any significant adverse impact on the water environment as required by the Water Framework Directive and related regulations and as appropriate, mitigation to minimise any adverse effects is provided; and
- vii. there are no significant adverse effects on air, water or soil quality and as appropriate, mitigation to minimise any adverse effects is provided.

Development proposals must also accord with other relevant policies and proposals in the development plan and with appropriate supplementary guidance.

### Community Infrastructure Assessment

**3.24** Community infrastructure assessment is required to recognise and address the impact a development may have on a specific area, for example, on the road network, educational provision, recreational areas and community facilities. Contributions from developers will be sought to address the direct consequences or impacts of a proposed development. They are not intended to resolve existing deficiencies in infrastructure.

**3.25** Taking account of the economic circumstances and the constraints on funding and resources the Council takes a reasonable and proportionate approach to the level of contribution expected and the timing of providing the funding. In doing so it will aim to strike a balance between setting contributions at a level that addresses projected impact and ensuring that the development remains viable but in turn delivers economic and social benefits. Where there is a need for new infrastructure in areas where there may be combined developments, such as Community Growth Areas, pooled contributions may be appropriate.

### Policy 5 Community Infrastructure Assessment

Where development proposals would require capital or other works or facilities to enable the development to proceed, financial contributions towards their implementation will be required. These contributions will be appropriately assessed and developers will be required to ensure transparency in the financial viability of a development. In each case contributions must:-

- i. serve a planning purpose;
- ii. be necessary to make the proposed development acceptable in planning terms;
- iii. be directly related to the proposed development;

## Vision and Strategy 3

- iv. be fairly and reasonably related in scale and kind to the proposed development and
- v. be reasonable in all other aspects.

The Council will either seek the direct provision of such works or facilities by developers, or, in appropriate cases, a financial contribution from the developer to fund off site provision either by third parties or by the Council itself. Where contributions are required these should be secured through planning condition or a legal agreement before permission is issued. Lump sum payments for capital works will normally be made when the work is carried out but consideration will be given to the use of endowments, phased payments, or other mechanisms, provided clear timeframes are agreed.

Development proposals must also accord with other relevant policies and proposals in the development plan and with appropriate supplementary guidance.

### General Urban Areas/Settlements

**3.26** The LDP seeks to protect and enhance the quality of life of South Lanarkshire's residents within its main urban areas and small settlements. To achieve this, the character and amenity of these areas has to be safeguarded. The majority of the built up areas of South Lanarkshire are not subject to specific policies and proposals identifying development opportunities. It is nonetheless important that these areas are safeguarded and enhanced and the amenity enjoyed by their residents is protected.

**3.27** This policy will apply to all those areas, within the recognised settlement boundaries, where no specific policies or proposals apply. Further policy detail is provided in the Development Management, Place Making and Design Supplementary Guidance.

### Policy 6 General Urban Area/Settlements

Within the urban areas and settlements identified on the proposals map, residential developments and those of an ancillary nature such as guest houses, children's nurseries, medical facilities, community uses, small scale retail or workshop units may be acceptable, provided they do not have a significant adverse affect on the amenity and character of the area. Developments, particularly 'bad neighbour' uses which by virtue of visual impact, noise, smell, air pollution, disturbance, traffic or public safety will not be permitted if they are detrimental to the amenity of residents.

Each proposal will be judged on its own merits with particular consideration given to the impact on the amenity of the area, proposed servicing and parking arrangements and where appropriate, an assessment of the contribution of the proposal to meet an identified local need.

Development proposals must also accord with other relevant policies and proposals in the development plan and appropriate supplementary guidance.

## 4 Economy and Regeneration

### Employment

**4.1** Promoting sustainable economic growth is a key objective of the SLLDP. Providing and identifying a range and choice of sites suitable for economic development can make a significant contribution towards meeting this objective. The SDP identifies a number of strategic economic investment locations (SEILs), targeted at key growth sectors which require to be promoted or safeguarded in the LDPs. These locations include development opportunities at Clyde Gateway and Poniel and safeguarded sites at Hamilton International Technology Park (HITP), Scottish Enterprise Technology Park (SETP) and Peel Park North.

**4.2** There are also a number of Development Framework sites identified in the SLLDP which contain opportunities for employment related development. Additionally, there are a wide range of other industrial estates and business locations in South Lanarkshire. These range from large modern estates to low amenity local yardspaces. All these areas have a role in providing local employment opportunities and the majority continue to function well as locations for industrial and business use. These are retained as 'core' industrial and business areas. In some areas there has been an increase in vacancy rates and pressure for non-industrial/ business uses. These have been identified in the Industrial, Commercial and Retail Development Technical Report as 'other employment land use areas' where a more flexible approach to non-industrial proposals will be taken. The criteria for assessment of development proposals in these locations will be set out in supplementary guidance.

**4.3** There is also a need to maintain a supply of marketable sites for industry and business across South Lanarkshire which range in size and amenity, to meet a variety of requirements. A review of such sites has been undertaken and some previously considered as marketable have reverted to a general industrial designation. The Industrial, Commercial

and Retail Development Technical Report describes how the categories of employment land were identified. It also lists the sites and locations in each category.

**4.4** In Lanark and Carluke there is a local shortage of marketable land which the Council proposes to address by extending the existing industrial estates at Caldwellside, Lanark and Castlehill, Carluke. These extensions will be 'core' industrial and business areas.

**4.5** The Office/Service sector is an important part of the South Lanarkshire economy. In general, class 4 offices shall be supported in industrial and business locations and class 2 offices in town and neighbourhood centres. The locational considerations and criteria relevant to the assessment of office proposals will be set out in supplementary guidance.

**4.6** South Lanarkshire's location on the edge of the central belt and major north-south and east-west transport links and the high quality historic and natural environment gives the area a large potential tourist market, especially for short breaks and day visitors. South Lanarkshire also offers a wide variety of tourist and visitor attractions that contribute to the local economy by providing employment and generating expenditure on goods and services. In particular New Lanark, one of only four world heritage sites in Scotland, is a major attraction for visitors.

**4.7** The SLLDP seeks to encourage sustainable tourism developments in appropriate locations that conserve the quality of the natural and historic heritage of the area on which many of the tourist attractions and activities are based. There is a need to promote existing tourist attractions and protect these from inappropriate development activity.

**4.8** The Council is a member of the Clyde and Avon Valley Landscape Partnership (CAVLP) which includes several public bodies and charitable organisations. It aims to work with communities and landowners to

## Economy and Regeneration 4

identify and develop projects which not only conserve the natural and built heritage of the area but also provide the community with a range of volunteering and learning opportunities.

**4.9** The SLLDP encourages sustainable economic growth and regeneration through these different sectors. This will be delivered through the development of appropriately located sites and the implementation of projects, supported by the Plan’s policies that will develop the area’s tourist potential and the management and interpretation of its natural, built and cultural resources.

### Policy 7 Employment

The Council will support sustainable economic growth and regeneration by encouraging the development of business in South Lanarkshire through the identification of employment land use areas. The categories of employment land use areas and appropriate uses are set out in Table 4.1 and shown on the proposals maps.

A range and choice of marketable sites for employment uses across South Lanarkshire will be maintained. The Council will monitor this through the annual land audit process.

Class 4 office developments shall be supported in employment land use areas and class 2 offices in town and neighbourhood centres.

Detailed criteria for the assessment of proposals within the employment land use areas, for all industrial/business proposals outwith these areas and appropriate locations for office developments, are set out in supplementary guidance.

The provision of good quality visitor attractions and accommodation will be supported based on the sustainable management and interpretation of the area’s natural, built and cultural resources.

Development proposals must also accord with other relevant policies and proposals in the development plan and appropriate supplementary guidance.

Table 4.1 Schedule of Employment Land Categories

Proposed Designation	Role and Characteristics	Policy approach
Strategic Economic Investment Locations (SEILs)	<p>Strategically important locations identified in the Strategic Development Plan.</p> <ul style="list-style-type: none"> <li>Clyde Gateway (Shawfield) (business and financial services/distribution and logistics)</li> <li>Poniel (Clydesdale) (distribution and logistics)</li> <li>Hamilton International Technology Park (business and financial services/life sciences/creative and digital industries)</li> <li>Scottish Enterprise Technology Park (East Kilbride) (life sciences/creative and digital industries/green technologies)</li> <li>Peel Park North (East Kilbride) (life sciences/creative and digital industries)</li> </ul>	<p>Promote development of the key sectors identified in SDP (See Appendix 3 Development Priorities). Presumption against non industrial/business developments and change of use.</p>

## 4 Economy and Regeneration

Development Framework Sites	Large mixed use sites where employment uses will be integrated with other land uses	Requirements for each Development Framework Site are set out in Appendix 3 Development Priorities
Core Industrial and business areas	Established industrial and business areas which range from modern attractive business parks to local yardspace areas. These are shown on the proposals maps and listed in the Industrial, Commercial and Retail Development Technical Report and supplementary guidance.	These areas are retained for industrial /business use (class 4/5/6) and any exceptions must meet the criteria in SG.
Other employment land use areas	Areas designated for industrial use but where there is an increasing element of non industrial use. These are shown on the proposals maps and listed in the Industrial, Commercial and Retail Development Technical Report and supplementary guidance.	A flexible approach to development in these areas with non industrial uses (except residential/retail) considered provided these meet certain criteria in SG.

### Strategic and Town Centres

**4.10** Shopping patterns are changing and this has an impact on the role and function of town centres. There is a need to ensure that town centres are fit to support the economic and social aspirations of their communities. The Scottish Government is responding by undertaking a Scottish Town Centre Review due to be published in spring 2013. The results of this will generate policy outcomes at national and local levels.

The Industrial, Commercial and Retail Development SG will provide further guidance on the network of centres and take account of the findings of the Scottish Town Centre Review.

**4.11** The individual centres in South Lanarkshire support a diverse range and scale of economic and social roles and functions. These include shops, offices, entertainment, civic, education, health and leisure activities. Collectively they make up a network of centres ranging from strategic and town centres to neighbourhood centres. These are listed in Tables 4.2 and 4.4.

Table 4.2 Strategic and Town Centres

Category	Centres
<b>Strategic Centres:</b>	East Kilbride Hamilton Lanark
<b>Town Centres:</b>	Blantyre Biggar Cambuslang Carluke Larkhall Rutherglen Strathaven

## Economy and Regeneration 4

**4.12** Strategic centres, are facing major challenges adapting to the economic downturn, the rise of large out-of-centre superstores, the changing format of stores and the increasing use of online shopping. This results in an increasing proportion of vacancies and a reduction in the quality and choice of goods and services. The SDP has identified the roles and function of each centre, the challenges they face and the actions needed to ensure these centres can continue to play their part in providing communities with sustainable access to the services and goods they need (as shown on Table 4.3). The Council acknowledge this and will:-

- safeguard and protect the strategic centres,
- adapt to the changing needs of occupiers and advances in technology,
- support appropriate marketing and promotional initiatives to help sustain the centres and improve footfall.

Table 4.3 Network of Strategic Centres Roles and Functions; Managing Change

Centre	Dominant Roles and Function	Challenges	Action
East Kilbride	Town centre with retail, civic and community, leisure, employment and business	Competition from other centres	Build on existing catchments and public transport linkages. Review and assessment to improve retail quality/provision
Hamilton	Town centre with retail, leisure, civic, community, employment and business use	Competition from retail locations	Promote further urban realm and improve quality of the retail on offer
Lanark	Town centre with civic and community, tourism and culture	Limited rural catchment and accessibility	Enhance role as a market town, improve accessibility

**4.13** As with the strategic centres a similar pattern is emerging in the Council’s other Town Centres in response to changing shopping patterns. A key planning issue will be to ensure they continue to provide shopping facilities that meet consumer expectations of choice and quality and which are accessible by good public transport networks.

### Policy 8 Strategic and Town Centres

Within the Strategic and Town Centres listed in Table 4.2 the Council will allow a mixture of uses compatible with their role as commercial and community focal points. This will include shops, offices, leisure, community, civic, health, residential and other appropriate uses which support the network of centres.

The Council will endeavour to undertake Health Checks for each of the Strategic and Town Centres and this work will be subject to stakeholder consultation.

Development proposals must also accord with other relevant policies and proposals in the development plan and appropriate supplementary guidance.

### Neighbourhood Centres

**4.14** Within smaller towns, villages and neighbourhoods there is typically a small group of shops including grocers, newsagent's, chemist, bakers and other services which serve the local community. These centres may also have hot food shops, betting offices and hairdressers. These provide a day-to-day service and are particularly important to less mobile people in communities. It is important to preserve the retail function of these centres. In particular the Council would be concerned if convenience (food) shopping were to disappear from these smaller centres. Table 4.4 lists the neighbourhood centres.

## 4 Economy and Regeneration

Table 4.4 Neighbourhood Centres

Neighbourhood Centres	
	<b>Cambuslang/Rutherglen Area:</b>
	Burnside
	Fernhill
	Halfway
	King's Park
	<b>East Kilbride Area:</b>
	Calderwood
	East Kilbride Village
	Greenhills
	Lindsayfield
	Stewartfield
	St James Centre
	St Leonards
	The Murray
	Westwood
	<b>Hamilton Area:</b>

	<b>Clydesdale Area:</b>
	Blackwood/Kirkmuirhill
	Carnwath
	Coalburn
	Crossford
	Douglas
	Forth
	Law
	Lesmahagow

**4.15** The Council also recognises that not all centres have the same profile and there may be instances where a centre has a higher proportion of retail to non-retail uses and vice-versa. The Council expects that centres will continue to have a role to play in the provision of retail uses

for the community they serve. Consequently when assessing development proposals regard will be given to the impact the proposal has on the role and function of the centre.

### Policy 9 Neighbourhood Centres

Any proposals for changes of use within neighbourhood centres will be assessed with regard to the need to have an appropriate mix of uses. A retail element should be retained to serve the needs of the local community.

Development proposals must also accord with other relevant policies and proposals in the development plan and appropriate supplementary guidance.

### Out of Centre Retail and Commercial Locations

**4.16** In addition to the strategic, town and neighbourhood centres there has been demand for other retail and commercial floorspace outwith these centres. The location of out-of-centre retail and commercial developments, both operational and consented, are shown on the proposals map and listed in Table 4.5. In some cases the location is restricted to commercial uses only.

## Economy and Regeneration 4

Table 4.5 Out-of-Centre Retail/Commercial Locations

Out-of-Centre Retail/Commercial locations (operating)	<p><b>Cambuslang/Rutherglen Area:</b>                  Bridge Street                  Dalmarnock Road</p> <p><b>East Kilbride Area:</b>                  Auction Market, Strathaven                  Howard Avenue                  Kingsway East (Commercial)                  Kingsgate Retail Park                  Linwood Avenue/College Milton                  Mavor Avenue                  Stroud Road/Kelvin Road (Commercial)</p> <p><b>Hamilton:</b>                  Cherryhill, Larkhall                  Hamilton Retail Park                  Whistleberry Retail Park</p> <p><b>Clydesdale:</b>                  Loch Park Carluke                  Teiglum Rd Lesmahagow</p>
<b>Out-of-Centre Retail/Commercial locations (consented)</b>	<p><b>East Kilbride Area:</b>                  Peel Park/Redwood Crescent</p> <p><b>Clydesdale:</b>                  Stanmore Road, Lanark (Commercial)</p>

### New Retail/Commercial Proposals

**4.17** There is continued interest in retail and commercial development. The retail development market is changing with a move towards a focus on convenience goods. As a consequence the format of proposed stores is reducing in size from a supermarket format (approximately 9,000sqm gross and above) to smaller convenience stores ranging from approximately 5,000m<sup>2</sup> to 1,000m<sup>2</sup> gross. Proposals of this nature can often look to out-of-centre locations. However, such alternative locations will only be considered once the strategic and town centres and/or local and neighbourhood centres have been assessed through the sequential approach outlined in Policy 10. Policy 10 also requires that developers must assess the impact of the proposal on the vitality and viability on

the strategic and town centres and neighbourhood centres and demonstrate there will be no unacceptable cumulative impacts. New retail/commercial development proposals require to be supported by the catchment area’s population and should be in locations that reduce the need to travel by private vehicle and be accessible by walking/cycling routes and public transport.

### Policy 10 New Retail/Commercial Proposals

Any proposals for retail or commercial development will be assessed against the following criteria and must:

- i. follow the sequential approach as set out in SPP;
- ii. not undermine the vitality and viability of the strategic and town centres and/or neighbourhood centres;
- iii. be supported by the area’s catchment population;
- iv. complement regeneration strategies for the area;
- v. promote sustainable development;
- vi. take account of development location and accessibility;
- vii. minimise environmental and traffic impact;
- viii. have no significant adverse impact on natural and/or built heritage resources, including Natura 2000 sites and Protected Species
- ix. promote quality design and accessibility for all;
- x. take account of drainage and service infrastructure implications.

Major development proposals over 2,500m<sup>2</sup> (gross) comparison floorspace; 1,000m<sup>2</sup> (gross) convenience should be accompanied by a retail assessment.

## 4 Economy and Regeneration

This assessment should include a quantitative assessment of retail impact and capacity, and the qualitative impacts of the proposal. The cumulative effect of recently implemented or consented retail developments in nearby locations should also be taken into account. In particular locations, for example neighbourhood centres, a retail assessment may also be required for developments less than 1,000m<sup>2</sup>(gross) floorspace.

Any proposals must also take account of other relevant policies and proposals in the development plan and with appropriate supplementary guidance.

### Economic Development and Regeneration

**4.18** There have been many successes over the last few years in tackling social inclusion and rebuilding local communities. However, significant challenges remain in ensuring that everyone in South Lanarkshire has the opportunity to benefit from the employment opportunities generated by the area's economic investment locations, development sites and the existing industrial and commercial centres. The 2012 Scottish Index of Multiple Deprivation (SIMD) identifies 53 datazones within South Lanarkshire (13.3%) that are included within the most deprived 15% of datazones in Scotland. South Lanarkshire has the fifth largest number of 'employment deprived' (26,880) and the fifth largest number of 'income deprived' people in Scotland (43,760). Areas within Rutherglen/Cambuslang, Blantyre/North Hamilton, Larkhall, Stonehouse and the Douglas Valley remain a continuing concern.

**4.19** Much more needs to be done to tackle the needs of South Lanarkshire's most deprived communities and it is only through long term, sustained and focused action that the complex and inter-related root causes of poverty can be addressed. This can be done by providing appropriate and readily accessible job opportunities for the people who

live here. In response to these challenges, the Council's regeneration programmes, particularly those that aim to improve the employability of people out of work, continue to have a focus on the areas covered by the worst 15% datazones. For example, approximately 40% of clients supported by the Council's jobs access activities come from these datazones.

**4.20** The Council has a long and successful history of investment in employment and employability services for local people. It is keen to derive community benefits by way of training and employment opportunities linked to additional new investment and it works pro-actively with business to provide a wide range of support that directly assists employers with recruitment and training. This can include customised training programmes delivered in partnership with other public sector agencies and designed to meet the specific requirements of recruiting companies.

**4.21** South Lanarkshire has approximately 8,000 businesses. The majority of these are small, employing fewer than 50 employees (over 90%) and the remaining 10% of businesses employ between 50 and 1,000 people. The businesses are reasonably spread throughout the Council area with a higher concentration approximately 40%, in the East Kilbride area. The Council's Business Support programmes are well established and provide grants and loans to local businesses where they need financial assistance with a project to make it happen. These are aimed at projects where the company will increase/safeguard jobs and turnover/profitability in the local economy. A programme aimed at engaging with local businesses to develop their tendering awareness and skills is also in operation to ensure they can capitalise on supply chain and public spending opportunities where they arise.

**4.22** Within this context the Council, through policies and proposals in the SLLDP, will seek to support its wider economic and regeneration activities and those arising from the Single Outcome Agreement and

## Economy and Regeneration 4

Community Planning. This will be achieved by supporting developments that will generate sustainable economic activity and create employment opportunities. Where appropriate, the Council will encourage and work with developers to access the local supply chain and explore the means to create local targeted employment opportunities, thereby maximising the local economic benefits from a development.

### **Policy 11 Economic Development and Regeneration**

The Council will support activities that maximise economic development and regeneration particularly through implementation of the policies in this plan and the proposals listed in Appendix 3. Priority will be given to development proposals that deliver physical and community regeneration and positively contribute to the local economy.

## 5 People and Places

### Housing Land

**5.1** The development of housing is a key part of the economy and can be used as an indicator of an area's prosperity and attractiveness. Providing new housing of the right type at the right price can encourage people to locate or stay in the area. It is also a key landuse that, if poorly located, designed and delivered, can have an adverse impact on the environment and people's lives.

**5.2** A range of housing types, at different prices, tenures and locations are needed to cater for the increasing number and variety of households, maintain the viability of communities, and support the operation of local labour markets and the wider economy. This is particularly relevant when providing housing for first time buyers and encouraging young families to settle and remain in a specific location.

**5.3** The SLLP identified a range of sites dispersed throughout South Lanarkshire aimed at increasing the choice and availability of housing. This included the identification of more strategic sites such as community growth areas, development framework sites and residential masterplan sites. Progress on some of these has been slower than expected due to the economic downturn. These sites can continue to play a role in achieving the Plan's vision.

**5.4** With regard to the release of further sites, SPP states that a Housing Need and Demand Assessment (HNDA) should be carried out to provide an evidence base for defining housing supply targets and allocating land. Part of the evidence prepared for the SDP was an HNDA which sets the context and requirements for housing land allocation in LDPs. These requirements are outlined in Schedule 7 and 11A of the SDP. Schedule 7 estimates that between 2009 and 2020 South Lanarkshire should complete 15,800 units with a further 2,500 between 2020 and 2025. This gives a total estimated requirement of 18,300 private sector new build units to 2025. Schedule 11A considers the indicative all-tenure requirement from 2008/2009 to 2020 and from 2020 to 2025.

This suggests that South Lanarkshire is required to meet an indicative target of 29,100 units by 2020 and a further 3,800 by 2025 giving an overall requirement of 32,900. This is not a new build requirement but a combination of new build and restructuring of existing stock. These issues are discussed in more detail in the Housing Technical Paper and illustrated in Figure 4.

**5.5** Taking account of the above the Council has reassessed its land supply and has proposed changes which acknowledge the current effectiveness of sites and the likely timescales for development. This considered a number of factors including infrastructure availability, developer interest and marketability. The methodology used is outlined in Figure 4 and a full assessment is included in the Housing Technical Paper.

**5.6** The Council also recognises that in some areas the release of sites in sustainable locations can contribute towards the sustainable development of communities and generate economic activity.

**5.7** The Council will also expect the siting, design and layout housing developments, to accord with the principles of place making. Clear guidance on design, including successful place making, is provided in the Supplementary Guidance on Development Management, Place Making and Design.

**5.8** Taking all these factors into account the SLLDP has a clear aim relating to housing, to ensure a continuous five year effective supply of residential land, in appropriate locations, is available and that new developments display a sense of place and identity. Where possible, the Council will also assist housebuilders to bring forward sites previously considered non-effective or where development is not progressing as anticipated during the period of this plan.

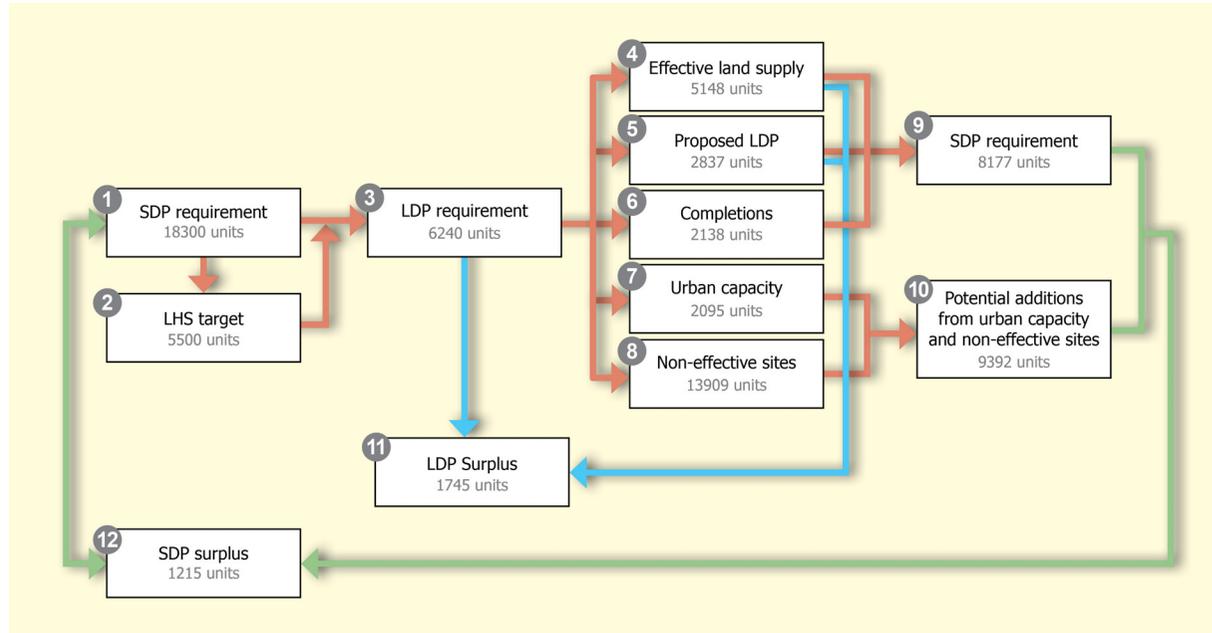

### **Policy 12 Housing Land**

There will be a five year effective supply of housing land at all times throughout the lifetime of the plan. This will be monitored and updated annually. The Council will support development on the sites included in the Housing Land Audit and identified on the proposals map.

Any development proposals must accord with other relevant policies and proposals in the development plan and with appropriate supplementary guidance.

## 5 People and Places

Figure 5.1 Private housing land supply and demand

**Notes:**

- 1 Strategic Development Plan requires 15,800 units 2009 to 2020 and a further 2,500 units 2020 to 2025. Total 18,300 units.
- 2 Local Housing Strategy target set at 5,500 units 2012 to 2017.
- 3 Local Development Plan requires 4800 units (800 units per annum at current building rates) 2014 to 2020 plus 30% generosity – total 6,240 units (just over 1000 units per annum).
- 4 Effective land supply 2012 5,148 units.
- 5 Proposed LDP 2,837 units.
- 6 Between 2009 and 2012 2,138 units were completed.
- 7 Urban Capacity could provide an additional 2,095 units.
- 8 Non-effective units as at 2012 13,909 units.
- 9 Additions from Effective Land Supply, completed units and LDP Sites (5,148 + 2,138 + 2,837) gives 10,123 units. SDP requirement 18,300 minus 10,123 gives shortfall of 8,177
- 10 Potential additions through non-effective units being developed and from urban capacity. 60% of non-effective (based on percentage usually developed) 8,345 units. 50% of urban capacity 1,047 units. Total 9,392 units.
- 11 LDP requirement 6,240 minus effective land supply of 5,148 and LDP sites of 2,837 gives surplus of 1,745 units.
- 12 SDP requirement of 18,300 minus additions (shown in note 9 above) of 10,123 gives shortfall of 8,177. Then add on additions of 9,392 (from urban capacity and non-effective units) gives surplus of 1215 units.

## Affordable Housing and Housing Choice

**5.9** Housing is a basic need and having somewhere to live that is safe and warm provides a firm basis for other aspects of life. A key priority in 'Connect' the Council Plan 2012-2017 is to improve the quality, access and availability of housing. This can be done in a variety of ways including the provision of affordable housing and choice of housing type and location.

**5.10** Affordable housing is defined in SPP as 'housing of a reasonable quality that is affordable to people on modest incomes'. Typically it is housing available at below market prices that meets the needs of those unable to afford to buy or rent on the open market. The HNDA and the GCVSDP identify a likely requirement of 85,000 units of affordable housing between 2008 and 2025 with 14,600 (17%) required in South Lanarkshire.

**5.11** In setting an overall housing supply target, the Council in its Local Housing Strategy (LHS), considered a wide range of factors, including the availability of public subsidy and the contribution to be made by making best use of the existing affordable housing stock. The assessment undertaken for the purpose of the LHS is summarised in the Housing Technical Paper. For affordable housing the LHS concludes that the overall supply target should be 180 to 200 units per annum. The Affordable Housing and Housing Choice Policy has been produced to enable the implementation of these requirements and this policy applies across all four Housing Market Areas (HMAs) in South Lanarkshire. These are Cambuslang/ Rutherglen, East Kilbride, Hamilton and Clydesdale. These HMAs are relatively self contained areas within which most people move house when their needs or circumstances change.

**5.12** The Council has produced supplementary planning guidance on affordable housing and housing choice. This provides details on the levels of contribution the Council will expect, either financially or through the provision of serviced land, in order to meet its affordable housing needs. This will be reviewed in the updated supplementary guidance. To facilitate

the delivery of social rented housing, in circumstances where contributions are required as part of the Community Infrastructure Assessment for a development, which includes the provision of social rented housing land, the social rented housing provider will be exempt from making contributions, with the balance being made up from the remaining part of the development.

**5.13** In addition to affordable housing the Council expects developers to provide a diverse and attractive mix of house types and sizes. This should include different tenure mixes to ensure that a full range of housing types are provided in order to meet a range of housing need and demand.

### Policy 13 Affordable Housing and Housing Choice

The Council will expect developers to contribute to meeting affordable housing needs across South Lanarkshire by providing, on sites of 20 units or more, up to 25% of the site's capacity as serviced land for the provision of affordable housing, where there is a proven need. If on-site provision is not a viable option the Council will consider off-site provision in the same Housing Market Area.

The provision of a commuted sum will only be acceptable if on or off site provision cannot be provided in the locale or there are no funding commitments from the Scottish Government. The Council will require developers to make a contribution to fund social rented affordable housing on alternative locations within the same Housing Market Area.

In addition developers must provide a range of house size and types to give greater choice in meeting the needs of the local community whilst recognising the demands of the wider housing market area.

## 5 People and Places

Development proposals must also take account of other relevant policies and proposals in the development plan and with appropriate supplementary guidance.

### Places

**5.14** The Council will also expect the siting, design and layout of all housing developments, to accord with the principles of place making. Clear guidance on design, including successful place making, is provided in the Supplementary Guidance on Development Management, Place Making and Design.

**5.15** The guidance together with the Development Management and Place Making policy in this plan emphasise that the Council expects new housing developments to have a distinct identity, create safe and pleasant places that are easy to move around and to be welcoming, adaptable and resource efficient. This will require housing proposals to demonstrate an understanding of their context and how it can be improved or acknowledged by building developments which respect the local character, provide valued and appreciated open space and create a distinctive identity. The aim being to create a desirable environment in which people will want to live and which provides the social, economic and environmental benefits they need. This will require proposals to pay particular regard to the terms of the Development Management and Place Making policy contained in this plan (Policy 4) and the associated SG.

**5.16** New housing developments can also generate a need for associated infrastructure. This can include social, recreational or educational facilities as well as improvements to road, water or sewerage infrastructure. Ensuring that housing developments have the right kind of supporting infrastructure is an important part of creating places that can meet the needs of the community and operate sustainably.

Consequently proposals will also have to accord with the terms of the Community Infrastructure Assessment policy contained in this Plan (Policy 5) and the associated SG.

**5.17** Taking all these factors into account the SLLDP has a clear aim relating to housing, to ensure a continuous five year effective supply of residential land, in appropriate locations, is available and that new developments possess a sense of place and identity which people can identify and value and have the supporting infrastructure they require. Where possible the Council will also assist housebuilders to bring forward sites, previously considered non-effective or where development is not progressing as anticipated during the period of this plan.

## Green Network and Greenspace

**6.1** The Green Network is a series of high quality connected greenspace which delivers a range of multiple benefits. This includes contributing towards place making, mitigating greenhouse gases through carbon storage, supporting biodiversity, enhancing health and quality of life, providing flood storage and areas for leisure activity. Strategically, South Lanarkshire lies within both the Central Scotland Green Network area and the GCV Green Network Partnership area. In addition, the Clyde Gateway has been identified as a strategic priority for delivery of the green network. This is reflected in the development framework requirements for Clyde Gateway. (Policy 1)

**6.2** At the local level there is a well established green network within the larger urban centres. This is complemented by a rural network of access routes, watercourses, wildlife corridors, parks and country parks which provide strategic linkages from the urban green network to the wider countryside. Extension and enhancement of the green network will be supported. Opportunities for creating new links to the network will also be considered when determining applications for new developments and in partnership with other public sector agencies. The role of the green network in promoting active travel will also be considered.

**6.3** Greenspace and other open space including sports pitches, are a major component of the green network. The SLLDP identifies priority greenspace sites which will be protected from development. Green network and greenspace policy seeks to protect existing resources from loss or fragmentation due to development but also recognises there are opportunities to extend and enhance the network and provide new links. There are also numerous small areas of greenspace in residential areas which enhance local amenity and provide accessible spaces for residents.

Development proposals for these areas is assessed through specific criteria contained in the Development Management, Place Making and Design Supplementary Guidance.

### Policy 14 Green Network and Greenspace

Any development proposals should safeguard the local green network, identified on the proposals map, and identify opportunities for enhancement and/or extension which can contribute towards:-

- i. place making,
- ii. mitigating greenhouse gases,
- iii. supporting biodiversity,
- iv. enhancing health and quality of life,
- v. providing water management including flood storage,
- vi. providing areas for leisure activity, and
- vii. promoting active travel.

The protection and enhancement of the green network will be a core component of any masterplan, development framework site or community growth area.

The loss of any areas of priority greenspace, identified on the proposals map, will not be supported. Partial loss will only be considered where it can be demonstrated that:

- the retention or enhancement, including positive management of the areas to be retained can be best achieved by the redevelopment of part of the site which would not affect its function;
- there is no significant adverse impact on the landscape character and amenity of the site and surrounding area;

## 6 Environment

- there is no significant adverse impact on natural and/or built heritage resources, including Natura 2000 sites and Protected Species;
- compensatory provision of at least equal quality and accessibility is provided locally.

Any development proposals which may impact on greenspace and green networks must also accord with other relevant policies and proposals in the development plan and with appropriate supplementary guidance.

### Natural and Historic Environment

**6.4** Protecting and enhancing the natural and historic environment is a key objective of the SLLDP. South Lanarkshire contains a diverse range of resources including internationally and nationally designated sites, protected species, listed buildings, conservation areas and numerous locally important designations. In addition, SPP directs Planning Authorities to take into account the wider environment and take a strategic approach to natural heritage, including recognition of its role in tackling climate change.

**6.5** Policy 15 identifies a hierarchy of natural and historic designations where different degrees of protection will be required. The hierarchy is summarised in Table 6.1 and will be explained in more detail in supplementary guidance on the Natural and Historic Environment. This will set out detailed policies which apply to these designations and other environmental resources and will also outline good practice guidance for developers.

**6.6** Many of the designations also form part of the green network which connects greenspace in and around settlements. This is separately addressed in Policy 14 Green Networks and Greenspace.

**6.7** The extensive rural area of South Lanarkshire also offers opportunities to create new woodlands and forestry in line with the Glasgow and Clyde Valley Forestry and Woodland Framework. Similarly through the Council's participation in the Clyde and Avon Valley Landscape Partnership there will be an opportunity to take forward projects which will conserve and enhance the unique landscape and cultural heritage of the Clyde and Avon Valleys.

### Policy 15 Natural and Historic Environment

The Council will assess all development proposals in terms of their effect on the character and amenity of the natural and built environment. In addition, where specific designations are affected, as listed in Table 6.1 - Natural and Historic Environment Designations and as shown on the proposals map, the following applies:

#### Category 1, 2 and 3 sites

The Council will seek to protect important natural and historic sites and features, as listed in Table 6.1 and shown on the proposals map, from adverse impacts resulting from development, including cumulative impacts.

#### In Category 1 areas:

- Development which could affect Special Protection Areas (SPAs) and Special Areas of Conservation (SACs) will only be permitted where an appropriate assessment of the proposal demonstrates that it will not adversely affect the integrity of the site following the implementation of any mitigation measures. Proposals where it cannot be ascertained that it would not adversely affect the integrity

Environment 6

of the site will only be permitted where there are no alternative solutions and there are imperative reasons of overriding public interest.

ii) The Council will seek to protect and preserve the Outstanding Universal Value of New Lanark World Heritage Site. Development proposals affecting the world heritage site and its setting will be assessed against the detailed criteria set out in supplementary guidance.

In Category 2 areas development will be permitted where the objectives of the designation and the overall integrity of the area can be shown not to be compromised following the implementation of any mitigation measures. Any significant adverse effects must be clearly outweighed by social or economic benefits of national importance.

In Category 3 areas development which would affect these areas following the implementation of any mitigation measures will only be permitted where there is no significant adverse impact on the protected resource.

Where possible, any development proposals which affect natural and historic designations should include measures to enhance the conservation value of the site affected.

**Protected Species**

Development which will have an adverse effect on protected species following the implementation of any mitigation measures will not be permitted unless it can be justified in accordance with the relevant protected species legislation.

Development proposals must also take account of other relevant policies and proposals in the development plan and appropriate supplementary guidance.

Table 6.1 Hierarchy of Natural and Historic Environment Designations

Category	Designation
Category 1	Special Protection Areas
	Special Areas of Conservation
	World Heritage Site
Category 2	Scheduled Monuments and their setting
	Category A Listed Buildings and their setting
	National Nature Reserves
	Sites of Special Scientific Interest
	Inventory of Gardens and Designed Landscapes
	Inventory of Historic Battlefields
	Prime Agricultural Land (Categories 1,2 and 3.1)
	The Water Environment *
	Ancient Semi-natural Woodland (categories 1 and 2a on SNH Ancient Woodlands Inventory)
Category 3	Special Landscape Areas
	Category B and C Listed Buildings and their setting
	Other archaeological sites and monuments *

## 6 Environment

Conservation Areas
Local Nature Reserves
Tree Preservation Orders *
Other long established woodlands and woodlands of high conservation value
Peatlands *
Country Parks
Core Paths and Rights of Way
Quiet Areas

- Note: Designations with a \* are not shown on the proposals map

## Travel and Transport

**7.1** SPP highlights how the link between transport and land use has a strong influence on sustainable economic growth. It also highlights that the Local Transport Strategy (LTS) and SLLDP should be complementary and ensure consistency between the appropriate authorities involved in transportation. The SLLDP therefore has taken account of both the approved and emerging LTS.

**7.2** Transport Scotland's Infrastructure Investment Plan details that enhancements to the M8, M73 and M74 are programmed within this plan period. This will specifically result in improvements to the Raith interchange in South Lanarkshire, together with widening and junction improvements along much of the M74 between Raith and Maryville. Table 7.1 summarises road schemes identified by Transport Scotland and in the LTS. These are identified on the proposals map.

**7.3** Any proposals for new development must ensure that appropriate sustainable transport options are available. A longer term objective is to promote a change from private to public modes of transport. This can be achieved by encouraging public transport, providing walking and cycling routes which encourage active travel, linking the places where people live to town centres, community and recreational facilities and sustainably locating major employment hubs and educational establishments.

**7.4** This might not always be possible in rural areas and the SLLDP will aim to address this by reducing, where possible, the need to travel. This could be done by encouraging small businesses to locate in rural settlements to give employment opportunities to the local community.

Table 7.1 Road Schemes

Location	Project
Raith Interchange	M8/M73/M74 Improvements
Stonehouse	Relief Road
Stewartfield Way, East Kilbride	Enhancement
A726/Greenhill Road East Kilbride	Widening
Downiebrae Road, Rutherglen	Upgrade
Cathkin	Relief Road
Lanark	Town Centre Circulatory System

### Policy 16 Travel and Transport

New development proposals must consider and where appropriate mitigate the resulting impacts of traffic growth and have regard to the need to reduce the effects of greenhouse gas emissions but at the same time support and facilitate economic recovery, regeneration and sustainable growth.

Development of walking, cycling and public transport networks which provide a viable and attractive alternative to car travel, thus reducing the effects of transport on the environment, will be supported. In addition existing and proposed walking and cycling routes will be safeguarded including former railway lines which can provide walking, cycling and horse riding opportunities.

## 7 Infrastructure

Development proposals must also accord with other relevant policies and proposals in the development plan and with appropriate supplementary guidance. In particular proposals must conform to the Local Transport Strategy, Core Path Plan and the Council Guidelines for Development Roads.

### Water Environment and Flooding

**7.5** The water environment is made up of groundwater, surface water and watercourses and also includes the associated riparian zone. It also includes the catchments of watercourses and wetland networks. Developments should not have a significant adverse impact on any part of the water environment. SEPA is the regulatory authority responsible for ensuring that water quantity and quality is protected and maintained. The water environment has an important role to play in biodiversity and supports a variety of wildlife, including protected species, birds, aquatic species and biota.

**7.6** Under the Water Framework Directive (WFD), South Lanarkshire Council is the responsible authority for river basin management planning. A key factor in the SLLDP will be protecting and enhancing the water environment and preventing development from taking place within the floodplain or where it will have an impact on its function. SPP sets out the measures authorities are expected to take to tackle the issues of flooding and drainage in their development plans, particularly when dealing with developments which will impact on the functional floodplain or water environment generally.

**7.7** The SDP supports the protection and enhancement of the water environment and the reduction of flood risk through the delivery of the Metropolitan Glasgow Strategic Drainage Plan, the extension of the Glasgow and Clyde Valley Green network, the use of sustainable urban

drainage systems (SUDS) and the safeguarding of the storage capacity of the functional floodplain. Further details on the Water Environment and Flooding is included in supplementary guidance.

### Policy 17 Water Environment and Flooding

Any development proposals which will have a significant adverse impact on the water environment will not be permitted. This includes engineering works such as culverting. In determining proposals consideration shall be given to water levels, flows, quality, features, flood risk and biodiversity within the water environment. The use of buffer and no development zones will be introduced to protect the riparian zone.

The avoidance principle of flood risk management as set out in SPP must be met. Within areas identified as functional floodplain the Council will not support any development proposals except where a specific location is essential for operational reasons and appropriate mitigation measures can be taken that meet the principles of flood risk management.

Sites where flood risk may be an issue (due to the breaching of watercourses, surface water and run off and impact of the proposal on groundwater) shall be the subject of a local flood risk management assessment. Any development where the flood risk cannot be appropriately managed to prevent a significant adverse increase in the risk of flooding either on the site or elsewhere will not be permitted.

Development proposals must also accord with other relevant policies and proposals in the development plan and with supplementary guidance.

## Waste

**7.8** The Scottish Government's Zero Waste Plan (June 2010) set out a vision for reducing waste and treating it as a resource. In particular, before considering waste disposal, authorities must identify ways of reducing, reusing, recycling and recovering waste. This includes recycling demolition material as secondary aggregates, reusing 'green' waste and converting it to compost and recycling as much household waste as possible through the introduction of glass, paper and plastic bins for households (source segregation).

**7.9** SPP requires LDPs to identify appropriate locations for required waste management facilities. This includes thermal treatment plants, waste recycling and processing operations, and composting and anaerobic digestion plants which can contribute towards the move away from landfill. However, at this stage it is not known what implications this may have in land use terms. As a result a criteria based approach has been adopted to consider future waste related planning applications.

**7.10** There will still be a requirement to accommodate residual waste through landfill. In 2012 there was one consented landfill site to the south of East Kilbride at Rigmuir and one site approved for disposal of inert waste at Carscallan, Quarter. There is also an operational landfill site at Cathkin. However, an application to renew the permission for this site has been refused by the Council. Associated enforcement action sets out specific actions and a timetable for their implementation. Consent has been granted by the Council for a thermal waste processing facility at Dovesdale, Stonehouse. None of the pre-commencement conditions have been discharged to date and it does not benefit from a SEPA licence. On the basis of the foregoing the Council has taken the view not to show or safeguard either Cathkin or Dovesdale sites on the proposals map until these matters are resolved.

**7.11** Integral to this policy operating successfully is the need to ensure that new developments are designed to include appropriate provision for the recycling, storage and collection of waste materials. The Council expects new commercial, business, industrial and residential developments to incorporate the requirements of the Zero Waste Plan into their design and layout by minimising the generation of waste during their construction and operational phase.

### Policy 18 Waste

The Council will ensure that existing and new waste management facilities for the treatment and disposal of municipal and commercial waste, including waste transfer stations and recycling centres, shall be safeguarded for waste management use. Any development on or adjacent to these sites which would adversely affect, or be adversely affected by the operation of the facility will not be considered favourably.

Any proposals for waste management facilities such as landfill, waste recycling and processing operations, composting or anaerobic digestion plants and thermal treatment plants must accord with the criteria set out in supplementary guidance.

Planning applications for waste management operations shall be assessed against the following criteria:

- i. There is a demonstrated need for the facility or operation;
- ii. The site is suitably located in relation to the main sources of waste;
- iii. The impact on local communities and other sensitive land uses is considered acceptable;
- iv. The development will have no significant adverse impact on any natural or built heritage features including the Green Belt,

## 7 Infrastructure

- agricultural land, landscape and landscape character, habitats and species;
- v. The development will have no significant adverse impact in terms of local environmental effects including noise, dust, vibration, odour, air quality, attraction of vermin or birds, litter, potential for the pollution of surface water or ground water contamination;
  - vi. The site design will include appropriate lighting, nets for waste and pest control and will have suitable access, landscaping and screening to minimise visual impact;
  - vii. The hours of operation and the length of time of the proposed operation;
  - viii. Traffic volumes and the effects on the road network and road safety;
  - ix. There should not be a proliferation of sites in a locality that may be detrimental by virtue of cumulative impact;
  - x. Suitability of the restoration and aftercare proposals for the site.

In general waste management facilities, recycling centres and transfer stations will be directed to industrial locations and/or existing waste management sites unless other material considerations indicate otherwise.

Development proposals must also accord with other relevant policies and proposals in the development plan and with appropriate supplementary guidance.

### Renewable Energy

**7.12** Scottish Government Policy seeks to generate the equivalent of 100% of Scotland's gross annual electricity consumption by 2020. SPP requires planning authorities to support the development of a diverse

range of renewable energy technologies, guide development to appropriate locations and provide clarity on the issues that will be taken into account when specific proposals are assessed.

**7.13** In South Lanarkshire, onshore wind is the most significant renewable energy sector. There has been significant pressure for wind energy development in South Lanarkshire in recent years. The Council, in line with government policy, has taken a positive approach to accommodating such development. As a result there are now 384 turbines operating on consented windfarms of four and more turbines in South Lanarkshire, with around 850MW of generating capacity. This could potentially meet the electricity needs of around 450,000 homes. There are a further 200 single or small scale turbines operating or with planning consent and 100 still to be determined.

**7.14** The SDP has identified broad areas of search for windfarms over 20MW (diagram 16 in SDP) and advises that it will be for local development plans to take forward the refinement of these areas to establish their long term potential. The SDP areas of search did not address landscape capacity and cumulative impact. This has been done in South Lanarkshire through preparation of a landscape capacity and spatial framework for windfarms study, which has been updated for the SLLDP (see Spatial Framework Landscape Capacity for Wind Turbines updated 2012 Technical Report). This revised guidance identifies broad areas of search for windfarms over 20MW, areas of significant protection and areas where cumulative impact limits further development. Figure 3 illustrates the SDP areas of search and the refined areas of search identified through the LDP process.

**7.15** The Council approved its 'Renewable Energy Supplementary Planning Guidance' in 2010. An updated SG for Wind Energy containing the updated spatial framework and detailed criteria for the assessment of development proposals shall be issued with the SLLDP.

**7.16** There is increasing development pressure for single and small scale wind turbine developments. These will continue to be assessed on their merits against the criteria listed in supplementary guidance. However, due to the proliferation of such developments, an increasing emphasis shall be placed on cumulative impact issues when determining such applications.

**7.17** There has been limited interest in other forms of renewable energy development in South Lanarkshire. The SDP, for example, identifies opportunities for biomass woodfuel production on vacant and underused land around the urban area but to date these have not progressed. It is therefore considered that there is no need for a specific policy or supplementary guidance for renewable energy types other than wind. Applications that come forward will be considered on their merits and assessed against the relevant policies in the development plan and supplementary guidance.

**7.18** Policy 19 – Wind Energy sets out the overall approach to the assessment of wind energy proposals. It should be read in conjunction with supplementary guidance.

**7.19** The Council has a well established and approved mechanism for the collection and distribution of community benefit related to renewable energy development. The Council's Renewable Energy Fund (REF) currently administers community benefit schemes for a number of windfarms within South Lanarkshire. Contributions are based upon a minimum £2,500 per megawatt based on installed capacity, as approved by the Council on 1<sup>st</sup> December 2010. The REF will be reviewed as appropriate during the life of the LDP, with a view to considering how grant assistance could facilitate employment and investment in local communities. In accordance with Scottish Government guidance, such contributions are not treated as material considerations in the assessment

and determination of planning applications. Further guidance on contributions for renewable energy development is set out in supplementary guidance.

### Policy 19 Wind Energy

Applications for wind energy developments will generally be supported subject to the following considerations:

- i. all proposals for wind energy developments will be assessed against the criteria in the assessment checklist set out in Wind Energy Supplementary Guidance ;
- ii. the broad areas of search identified on the proposals map are the preferred location for windfarms over 20MW. Windfarm developments of any scale outwith these areas will be judged on their merits but must address the key constraints set out in supplementary guidance;
- iii. windfarm developments are unlikely to be supported in the following areas of significant protection as defined in supplementary guidance.
  1. International and national natural heritage designations (see policy 15)
  2. Southern Uplands foothills and Pentland Hills area of significant protection.
  3. Green Belt (proposals over 20MW);
- iv. windfarm proposals in areas where cumulative impact limits further development will only be considered if they address the landscape criteria set out in supplementary guidance;

## 7 Infrastructure

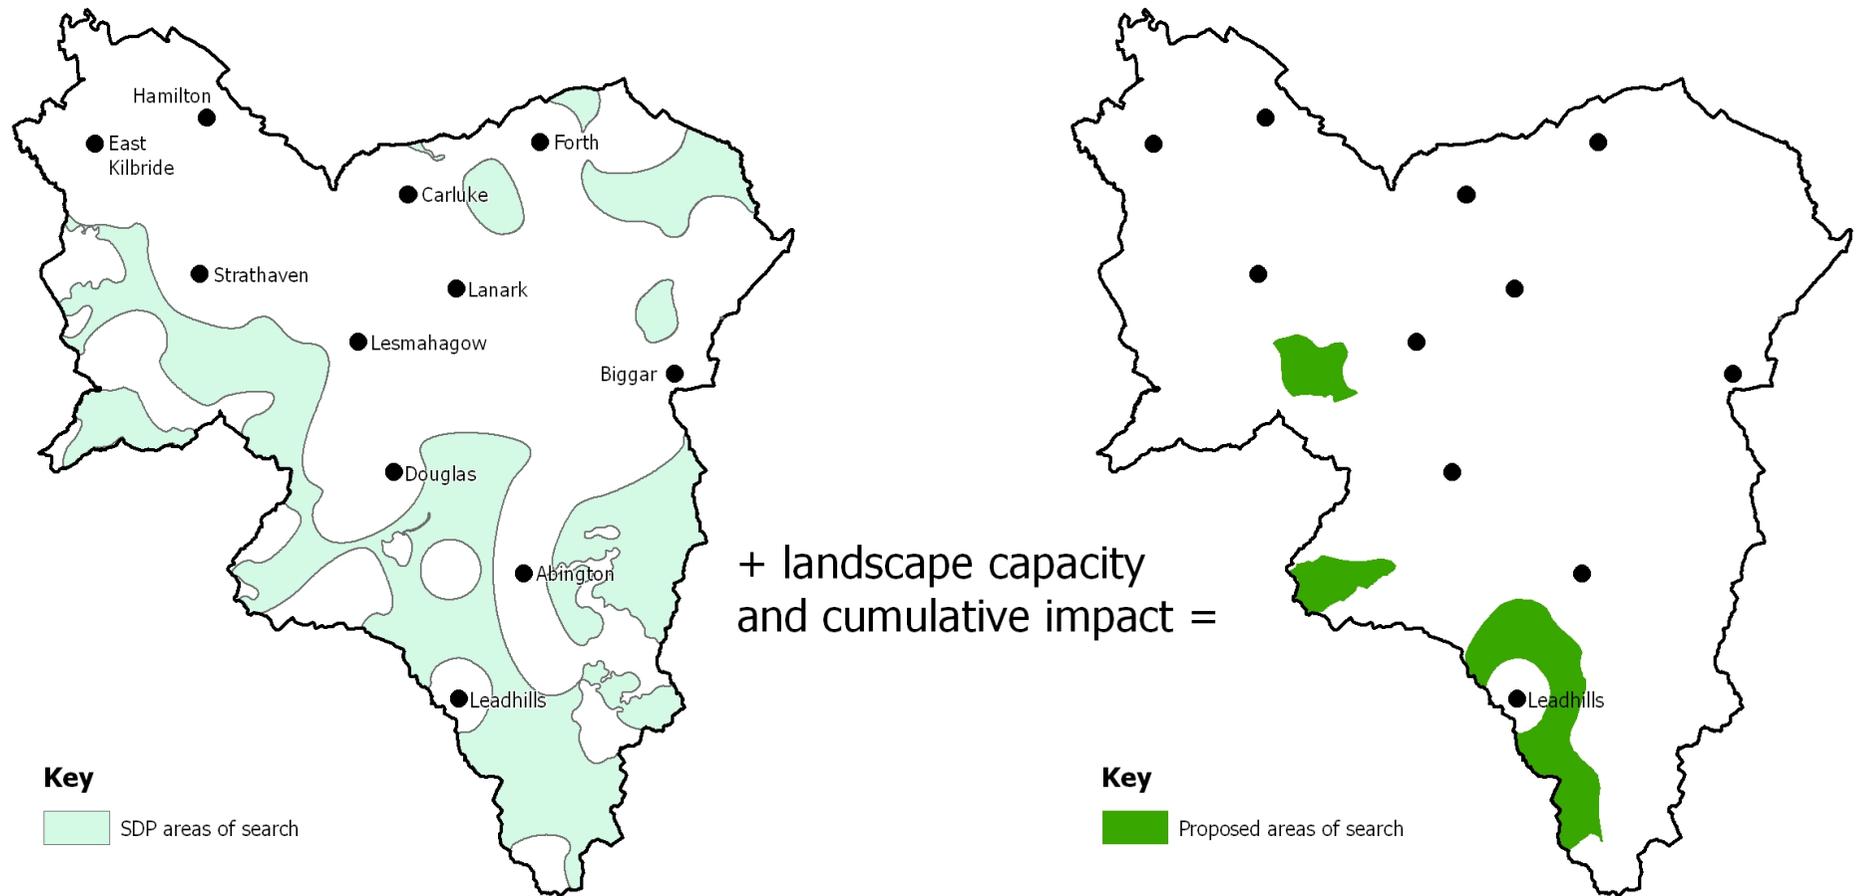

v. single and small scale wind turbine developments (less than 4 turbines) will be judged on their merits and assessed against the criteria in supplementary guidance. Particular attention shall be given to the cumulative impact and landscape capacity of these developments.

The Council will encourage operators of wind turbines/windfarms within South Lanarkshire to contribute to the Councils Renewable Energy Fund (REF) or another similar mechanism as appropriate.

Development proposals must also accord with other relevant policies and proposals in the development plan and with supplementary guidance.

## Appendix 2 Glossary of Terms

### Glossary of Terms

1. **Affordable Housing:** Housing for households who cannot afford to buy or rent accommodation generally available on the local market without support.
2. **Ancient Semi-natural Woodlands:** Class 1 and 2A on the SNH Inventory of Ancient and Long Established Woodland Sites.
3. **Brownfield Site:** Land which has previously been developed including vacant/derelict land; infill sites; redundant or unused buildings; and developed land within a settlement boundary where further intensification of use is acceptable. A brownfield site should not be presumed suitable for development, especially in Green Belt and rural area.
4. **Conservation Areas:** An area of particular architectural or historic value within which greater planning controls are exercised in order to protect the character of the area.
5. **Country Parks:** An area designated for people to visit and enjoy recreation in a countryside environment.
6. **Core Path Network:** These can comprise many different types of path and cater for all types of user. Provides links to the wider path network and countryside.
7. **Cumulative Impact (Retail):** Combined effect of all out-of-centre developments, developed and proposed, on the town centre, or on strategic centres.
8. **Derelict Land:** Land which has been so badly damaged by development or use that it is incapable of being developed for beneficial use without rehabilitation.
9. **Development Management:** Planning permission is almost always required for 'development' on any significant scale. This term is defined in law and covers a wide range of building and engineering work as well as changes in the way land and buildings are used. Planning law also covers changes to listed buildings and control of advertisements. Development Management Includes legislation on enforcement, appeals, schemes of delegation, local reviews, the hierarchy of applications as well as planning application procedures.
10. **Economic Benefit:** The net beneficial consequence of development over its economic life in terms of the economy of the area or community concerned, particularly in terms of employment.
11. **Edge of Centre:** A location within easy walking distance of the town centre, usually adjacent to the town centre, and providing parking facilities that serve the centre and the store.
12. **Effective Housing Land:** The part of the established housing land supply that is expected to be free of development constraints in the period under consideration, and available for the construction of housing.
13. **Environment Report (and Annex):** Documents the Strategic Environmental Assessment (SEA) of the SLLDP required by the Environmental Assessment (Scotland) Act 2005.
14. **Equalities Impact Assessment (EqIA):** This is a thorough and systematic analysis to determine the extent of the impact of a new policy upon the equalities categories.
15. **Established Housing Land:** The total housing land supply, including both constrained and unconstrained sites.
16. **Flagship Development:** Prestigious developments at key strategic locations.

## Appendix 2 Glossary of Terms

17. **Functional Flood Plain:** These store and convey flood water during times of flood. These functions are important in the wider flood management system. For planning purposes the functional flood plain will generally have a greater than 0.5% (1:200) probability of flooding in any year.
18. **Gap Site in Countryside:** A site bounded on at least two sides by built development and fronted by a road which should generally be capable of accommodating one house but a maximum of two subject to design being appropriate to the scale and nature of the adjacent development.
19. **Green Belt:** Policy framework intended to control the growth of built-up areas, the coalescence of settlements, and the encroachment of new development into the countryside.
20. **Greenfield Land:** Land which has never been previously developed or used for urban use, or areas land that have been brought back into active or beneficial use for agriculture or forestry.
21. **Habitats Regulations Appraisal:** Used to describe an assessment of the implications of the policies and proposals of the LDP on Special Protection Areas (SPAs) or Special Areas of Conservation (SACs) as required by Council Directive 92/43/EEC on the conservation of natural habitats and of wild fauna and flora (the Habitats Directive) as transposed into domestic law by the Conservation (Natural Habitats, &c.) Regulations 1994 as amended.
22. **Health Impact Assessment:** An assessment to predict the health consequences of a new policy or proposal and produces recommendation as to how the good consequences for health could be enhanced and how the bad consequences could be avoided or minimised.
23. **Housing Market Areas (HMAs):** Relatively self contained areas within which most people move house when their needs or circumstances change.
24. **Infill Sites:** These are small sites within a settlement that can accommodate up to 10 houses. Proposals should be of a design, scale, building density and layout so that the new infill development looks as though it had been planned as part of the original area.
25. **Integrity:** This term is used in relation to the impact of development on natural and built heritage resources. For nature conservation sites, the integrity of the site is "the coherence of its ecological structure and function, across its whole area, which enables it to sustain the habitat, complex of habitats and/or the levels of populations of the species for which it was classified." Landscape integrity is defined as the intactness of the individual characteristics of a landscape.
26. **Inventory of Gardens and Designed Landscapes:** This is a list of nationally important sites that meet the criteria published in the [Scottish Historic Environment Policy 2011](#).
27. **Inventory of Historic Battlefields:** The Inventory of Historic Battlefields is a list of nationally important battlefields in Scotland that meet the criteria published in Scottish Historic Environment Policy 2009. It provides information on the sites in it to raise awareness of their significance and assist in their protection and management for the future.
28. **Landscape Character Assessment:** Includes guidelines for assessing the sensitivity of different landscapes to development.

## Appendix 2 Glossary of Terms

29. **Listed Buildings:** A building which because of its special architectural or historic interest is included in a list prepared by the Scottish Ministers and afforded statutory protection.
30. **Local Development Plan (LDP):** Introduced by the Scottish Government in 2008 as replacement for the Local Plans. They will be relevant, up to date plans which are reviewed regularly to anticipate the broad scope and nature of change in the area and provide a co-ordinated framework for decision-making and will focus on the land use planning issues in an area.
31. **Local Housing Strategy (LHS):** The local housing strategy provides the strategic direction to tackle housing need and demand and to inform the future investment in housing and related services across the local authority area.
32. **Local Nature Reserves (LNRs):** Habitats of local significance that contribute nature conservation and provide opportunities for the public to see, learn about and enjoy wildlife. LNRs are designated by local authorities under section 21 of the National Parks and Access to the Countryside Act 1949.
33. **Local Transport Strategy:** The Local Transport Strategy (LTS) sets out the Council's vision for transport and the policies it wants to put into action.
34. **Main Issues Report (MIR):** This sets out the main planning issues for the Development Plan area and then a series of options as to the planning policies that could be used in the Proposed LDP.
35. **Major Development Proposals (Retail):** Over 2,000 square metres (gross) comparison (non-food) goods floorspace or 1,000 square metres (gross) convenience (food) goods
36. **Minerals Local Development Plan (MLDP):** Covers all aspects of mineral planning in South Lanarkshire.
37. **Monitoring Statement:** Highlights the changing context for planning and examines how the adopted plan has performed to date.
38. **National Nature Reserves (NNR):** These are areas of national and international purpose for study, research and the preservation of flora, fauna, geological and zoological interests of importance for nature conservation. These are declared by Scottish Natural Heritage.
39. **National Planning Framework2 (NPF2):** The Scottish Government's strategy for the long-term development of Scotland's towns, cities and countryside.
40. **Other Archaeological Sites and Monuments:** Sites or monuments that are of regional or local significance.
41. **Other Long Established Woodlands or Woodlands of High Conservation Value:** Categories 2B and 3 on the SNH Inventory of Ancient and Long Established Woodland Sites.
42. **Peatlands:** Land that consists of raised bogs and blanket bogs.
43. **Planning Advice Notes (PANs):** These are prepared by the Scottish Government and provide advice on good practice and other relevant information.
44. **Prime Agricultural Land:** Classes 1, 2 and 3.1 as defined in the Macaulay land capability classification.
45. **Priority Greenspace:** Areas of important open space within settlements identified through an Open Space Audit.

## Appendix 2 Glossary of Terms

46. **Quiet Areas:** Areas of good environmental noise quality designated under the Environmental Noise (Scotland) Regulations 2006.
47. **Renewable Energy:** Naturally occurring energy sources within the environment which can either be tapped without consuming the resource, or where the resource can renew itself on a human timescale.
48. **Retail Parks:** A single development of at least three retail warehouses with associated car parking.
49. **Retail Warehouse:** A large single-level store specialising in the sale of household goods such as carpets, furniture and bulky DIY items, catering mainly for car-borne customers and often in out-of-centre locations.
50. **Rights of Way:** A right for members of the public to pass peaceably and without the expressed or implied permission of the landowner between two public places along a more or less defined route.
51. **Riparian Zone:** Land relating to or situated on the banks of a river or land relating to wetlands adjacent to rivers and streams.
52. **Scheduled Ancient Monuments:** A building, monument or other historic structure that are considered to be of importance contributing significantly to the understanding of the past. They are given legal protection under the Ancient Monuments and Archaeological Areas Act 1979.
53. **Scottish Planning Policy (SPP):** The Scottish Government's national planning policy document.
54. **Serviced Land for Affordable Housing:** A proportion of a site which can be developed by or for a Registered Social Landlord (RSL) or the local authority. Such land can be transferred either at a value relating to its end use for affordable housing or by agreement between the developer and the RSL or local authority, at a lower value. In any event it should be transferred at less than the value for mainstream housing for sale.
55. **Sites of Special Scientific Interest (SSSI):** Key areas of nature conservation value for plants, animals, habitats or rock formations designated by SNH under the provisions of the Nature Conservation (Scotland) Act 2004.
56. **Special Areas of Conservation (SAC):** A European wide network of important sites containing rare or endangered species and habitats, (Natura 2000 sites) designated under the terms of the EC Directive on the Conservation of Natural Habitats and of Wild Flora and Fauna (The Habitats Directive).
57. **Special Landscape Area (SLA):** Local designation for quality and value of landscape.
58. **Special Protection Area (SPA):** Designated under the terms of Directive 2009/147/EC of the European Parliament and of the Council of Europe on the conservation of wild birds. These areas are specifically protected for their ornithological importance.
59. **Strategic Development Plan (SDP):** Introduced in 2008 as replacement for Structure Plans. These are produced by the four city region authorities and give a strategic overview of the areas upon which individual local authorities will build their Local Development Plans.
60. **Strategic Environmental Assessment (SEA):** Aims to provide a systematic method of considering the effects on the environment of a policy, plan, programme or strategy with the aim of helping to reduce or avoid environmental impacts.

## Appendix 2 Glossary of Terms

61. **Sustainable Development:** Defined by the Bruntland Report as 'all our needs should be met in a way which does not compromise the ability of future generations to meet their own needs'.
62. **Tree Preservation Orders (TPOs):** Used to protect individual and groups of trees considered important for amenity or because of their cultural or historical significance.
63. **UNESCO:** United Nations Educational, Scientific and Cultural Organisation.
64. **Vacant Land:** Land within settlements that is unused or unsightly and which would benefit from development or improvement.
65. **Vernacular Style:** Small traditional buildings which use local materials and methods.
66. **Vitality and Viability of Town Centres:** Vitality is a reflection of how busy a centre is at different times and in different parts. Viability is a measure of its capacity to attract ongoing investment, for maintenance, improvement and adaptation to changing needs.
67. **Water Environment:** All surface water, groundwater and wetlands.
68. **World Heritage Site:** a natural or man-made site, area, or structure recognised as being of outstanding international importance and therefore as deserving special protection. Sites are nominated to and designated by the World Heritage Convention (an organisation of UNESCO).

## Appendix 3 Development Priorities

### Development Priorities

Priority	Location	Requirements
Strategic Economic Investment Locations (SEILs)	Clyde Gateway (Shawfield) National Business District	<ul style="list-style-type: none"> <li>Promote development of the key sectors (identified in SDP) of business and financial services/distribution and logistics.</li> </ul>
	Hamilton International Technology Park	<ul style="list-style-type: none"> <li>Promote and safeguard existing key sectors (identified in SDP) of business and financial services/life sciences/creative and digital industries.</li> <li>Presumption against non industrial/business developments and change of use.</li> </ul>
	Peel Park North, East Kilbride	<ul style="list-style-type: none"> <li>Promote and safeguard existing key sectors (identified in SDP) of life sciences/creative and digital industries.</li> <li>Presumption against non industrial/business developments and change of use.</li> </ul>
	Poneil	<ul style="list-style-type: none"> <li>Promote development of the key sectors (identified in SDP) of distribution and logistics.</li> <li>Presumption against non industrial/business developments and change of use.</li> </ul>
	Scottish Enterprise Technology Park, East Kilbride	<ul style="list-style-type: none"> <li>Promote and safeguard existing key sectors (identified in SDP) of life sciences/creative and digital industries/green technologies.</li> <li>Presumption against non industrial/business developments and change of use.</li> </ul>
Network of Strategic Centres	Hamilton	<p>Update existing or undertake new Town Centre Action Plans focusing on the following issues:</p> <ul style="list-style-type: none"> <li>Role and function of centre</li> <li>Accessibility including improvements to transport hubs.</li> <li>Identify opportunities and deficiencies</li> <li>Conduct regular health checks</li> </ul> <p>Hamilton is also covered by the BID (Business Improvement District) project. Businesses agree to pay a small levy towards a fund which is used to improve and develop the area.</p>
	East Kilbride	<p>Update existing or undertake new Town Centre Action Plans focusing on the following issues:</p> <ul style="list-style-type: none"> <li>Role and function of centre</li> <li>Accessibility including improvements to transport hubs.</li> <li>Identify opportunities and deficiencies</li> <li>Conduct regular health checks.</li> </ul>

## Appendix 3 Development Priorities

	Lanark	<p>Update existing or undertake new Town Centre Action Plans focusing on the following issues:</p> <ul style="list-style-type: none"> <li>• Role and function of centre</li> <li>• Accessibility including improvements to transport hubs.</li> <li>• Identify opportunities and deficiencies</li> <li>• Conduct regular health checks.</li> </ul>
Community Growth Areas	Hamilton West	<ul style="list-style-type: none"> <li>• Definition of new landscape measures to consolidate new Green Belt edges and establish green networks within the development.</li> <li>• A new spine road and walking/cycling network connecting to improved public transport infrastructure.</li> <li>• Contribution to the extension/adaption of local Primary/Secondary Schools</li> <li>• Provision of local retail facility of a scale appropriate to serve the Community Growth Area.</li> <li>• Contribution to the enhancement of community facilities, including Eddlewood Pitches and Eddlewood Hall.</li> <li>• Contribution to the improvement/enhancement of road junctions, including Peacock Cross.</li> <li>• Provision of housing types to accord with Local Plan policies including affordable housing.</li> </ul>
	Ferniegair	<ul style="list-style-type: none"> <li>• Definition of new landscape measures to consolidate new Green Belt edges and establish green networks within the development.</li> <li>• Provision of housing types to accord with Local Plan policies including affordable housing.</li> <li>• Contribution to the extension/adaption of local Primary/Secondary Schools.</li> <li>• Contribution to enhancement of local community facilities in the area.</li> </ul> <ul style="list-style-type: none"> <li>• Local road network improvements.</li> <li>• Walking and cycling network throughout the development area.</li> </ul>
	Larkhall	<ul style="list-style-type: none"> <li>• Definition of new landscape measures to consolidate new Green Belt edges and establish green networks within the development</li> <li>• Contribution to the extensions of local Primary/Secondary Schools.</li> <li>• Provision of local retail facility of a scale appropriate to serve the Community Growth Area</li> <li>• The provision of new outdoor sports facilities with associated parking and changing</li> <li>• Provision of housing types to accord with Local Plan policies including affordable housing.</li> <li>• Local road network improvements</li> <li>• Walking and cycling network throughout the development area.</li> </ul>
	East Kilbride	<ul style="list-style-type: none"> <li>• Definition of new landscape measures to consolidate new Green Belt edges and establish green networks within the development</li> </ul>

## Appendix 3 Development Priorities

		<ul style="list-style-type: none"> <li>● Improved public transport services through the development area</li> <li>● Contribution to the improvement of park and ride facilities at Hairmyres Station</li> <li>● Local road network improvements and walking/cycling network through the development area</li> <li>● Provision of a new Primary School and pre-5 Nursery School.</li> <li>● Contribution to the extensions of local Secondary Schools.</li> <li>● Provision of local retail facility of a scale appropriate to serve the Community Growth Area</li> <li>● The provision of one grass sports pitch or equivalent provision locally.</li> <li>● Assess and consider the impact of development on the setting of listed buildings and other prominent buildings, including the police college, Newhouse of Jackton.</li> <li>● Provision of housing types to accord with Local Plan policies including affordable housing.</li> </ul>
	Newton	<ul style="list-style-type: none"> <li>● Definition of new landscape measures to consolidate new Green Belt edges and establish green networks within the development</li> <li>● Improved public transport services through the development area</li> <li>● A new spine road and walking/cycling infrastructure through the development area</li> <li>● Provision of a new Primary School including Community Wing, pre-5 Nursery School and extensions to other local Primary/Secondary Schools</li> <li>● Provision of local retail facility of a scale appropriate to serve the Community Growth Area</li> <li>● Investment in drainage infrastructure at Daldowie Waste Water Treatment Works</li> <li>● The provision of one grass sports pitch or equivalent provision at a local facility</li> <li>● Provision of housing types to accord with Local Plan policies including affordable housing.</li> </ul>
	Carluke	<ul style="list-style-type: none"> <li>● Definition of new landscape measures to consolidate new Green Belt edges and establish green networks within the development</li> <li>● Local road network improvements and walking/cycling network through the development area</li> <li>● Public transport services linking to Carluke railway station</li> <li>● Provision of local retail facility of a scale appropriate to serve the Community Growth Areas</li> <li>● Contribution to the extensions of local Primary/Secondary Schools</li> <li>● Contribution to local sports pitch upgrades</li> <li>● Investment in drainage infrastructure at Mauldslie Waste Water Treatment Works</li> <li>● Provision of housing types to accord with Local Plan policies including affordable housing.</li> <li>● Replacement pitch on site. (Carluke North)</li> </ul>
Development Framework Sites	Craighead, Blantyre	<ul style="list-style-type: none"> <li>● Mixed use development including residential, recreation and business use</li> <li>● Site should provide a combination of open space, structural planting and footpath networks linked to the Clyde Walkway.</li> <li>● A masterplan for the site be brought forward, the scope of which to be agreed with the Council, to demonstrate how the proposed land uses would integrate with adjoining land uses.</li> </ul>

## Appendix 3 Development Priorities

		<ul style="list-style-type: none"> <li>• Provision for extension of the Clyde Walkway.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Bothwell Road, Uddingston	<ul style="list-style-type: none"> <li>• Mixed use development including residential, retail and business use.</li> <li>• A masterplan for the site be brought forward, the scope of which to be agreed with the Council, to demonstrate how the proposed land uses would integrate with adjoining land uses.</li> <li>• Ensure development takes account of the high pressure gas pipeline and its buffer.</li> <li>• Ensure green network provision.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	DAKS, Larkhall	<ul style="list-style-type: none"> <li>• Mixed use development including commercial, business and residential use.</li> <li>• A masterplan for the site be brought forward, the scope of which to be agreed with the Council, to demonstrate how the proposed land uses would integrate with adjoining land uses.</li> <li>• Ensure green network provision.</li> <li>• Provision of housing types to accord with LDP policies including affordable housing.</li> </ul>
	East Kilbride Town Centre	<ul style="list-style-type: none"> <li>• Eastwards extension of town centre to incorporate Kittoch Field.</li> <li>• Additional retail floorspace the scale and nature to be determined through retail assessment.</li> <li>• Provision of new health centre and associated parking.</li> <li>• Consider options for redevelopment opportunities including the Stuart Hotel site.</li> <li>• Phased upgrading and redevelopment of existing town centre commercial floorspace.</li> <li>• Improved pedestrian and vehicular access.</li> <li>• Ensure green network provision.</li> </ul>
	Rolls Royce Works, East Kilbride	<ul style="list-style-type: none"> <li>• Mixed use residential led redevelopment, incorporating industrial/business/commercial uses, provision of a local centre of a scale appropriate to serve the development and other ancillary uses (for example a care home) subject to viability, following relocation of current occupier</li> <li>• A masterplan for the site be brought forward, the scope of which to be agreed with the Council, to demonstrate how the proposed land uses would integrate with adjoining land uses and to incorporate appropriate legacy works</li> <li>• Improvements to the road network as required and links to existing walking/cycling routes</li> <li>• Contributions to local community facilities as required</li> <li>• Ensure green network provision and related structural landscaping</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Mavor Avenue East, East Kilbride	<ul style="list-style-type: none"> <li>• Mixed use redevelopment the nature, scale and appropriateness of uses to be assessed in the context of all relevant national, structure or strategic plan and local plan policies and their impact on neighbouring uses.</li> </ul>

## Appendix 3 Development Priorities

		<ul style="list-style-type: none"> <li>• A masterplan for the site be brought forward, the scope of which to be agreed with the Council, to demonstrate how the proposed land uses would integrate with adjoining land uses</li> <li>• Ensure green network provision.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Langlands West, East Kilbride	<ul style="list-style-type: none"> <li>• A masterplan for the site be brought forward, the scope of which to be agreed with the Council, to demonstrate how the proposed land uses (including industrial, residential, recreation, community and ancillary uses) would integrate with adjoining land uses .</li> <li>• Ensure green network provision.</li> <li>• No adverse impact on the adjacent Langlands Moss Local Nature Reserve.</li> <li>• Site should provide a robust settlement edge through a clearly defined buffer zone which will include a combination of open space, structural planting and footpath networks.</li> </ul>
	Clyde Gateway, Rutherglen	<p>Transport:</p> <ul style="list-style-type: none"> <li>• improve connections to the M74 and the East End Regeneration Route including Shawfield Road;</li> <li>• connect Shawfield to the wider conurbation/City, Rutherglen Town Centre, and to Dalmarnock.</li> <li>• provide for cycling and walking access.</li> </ul> <p>Business and Industry:</p> <ul style="list-style-type: none"> <li>• The provision of a high quality series of both business (Class 4) and industrial (Class 5 and 6) employment locations.</li> </ul> <p>Green Network:</p> <ul style="list-style-type: none"> <li>• The identification and provision of quality open space links with Richmond Park and Glasgow Green through Shawfield and to the Clyde.</li> <li>• Ensure green network provision.</li> </ul> <p>Design:</p> <ul style="list-style-type: none"> <li>• The establishment of design principles that ensures the development area and its buildings provide an attractive location.</li> </ul> <p>Key Projects</p> <p>Shawfield: Creation of 'national business district'.</p>

## Appendix 3 Development Priorities

		<p>Infrastructure improvements, remediation of contamination and creation of development platforms for class 4 (Business), class 5 (industrial), class 6 (storage/distribution) and office uses along with ancillary commercial, leisure and retail uses with selective demolition of existing buildings and associated works.</p> <p>Rutherglen Low Carbon Zone: Infrastructure works required to facilitate future plot development, to include roads, footpaths, retaining structures, verges, primary service routes and site levelling. Class 4/5/6 development.</p> <p>Cambuslang Road (Two 74): Demolition of existing buildings and redevelopment of site to provide a mixed use development comprising employment units, hotel, cinema, food retail, non food retail and restaurant units</p> <p>Cuningar Loop:</p> <p>Formation of woodland park incorporating open space, path network, woodland planting, land regrading, street furniture and associated works. Formation of pedestrian bridge across River Clyde to allow access to the proposed park from the north and west. Proposal for development of a leisure/visitor attraction which would:</p> <ul style="list-style-type: none"> <li>• complement the existing leisure/visitor product in Glasgow,</li> <li>• provide significant capital investment into the Clyde Gateway area,</li> <li>• create sustainable long term jobs,</li> <li>• operate at a national /international level,</li> <li>• be capable of generating and sustaining significant visitor numbers</li> <li>• such a facility could include complementary retail, hotel and/or bar/restaurant uses</li> </ul>
	Market Road, Biggar	<ul style="list-style-type: none"> <li>• Resolve flooding issues.</li> <li>• Commercial/business uses.</li> <li>• Ensure green network provision.</li> </ul>
	Wellburn Farm, Lesmahagow	<ul style="list-style-type: none"> <li>• Mixed use development comprising of residential and class 4 business uses.</li> <li>• Ensure green network provision.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Bellfield, Coalburn	<ul style="list-style-type: none"> <li>• Development of new residential, recreation and local amenities incorporating the reclamation of Bellfield Bing</li> <li>• Respecting the integrity of the nearby Coalburn Moss SAC by identifying a 500 metre buffer zone from the edge of the SAC where there should be no development.</li> <li>• Ensure green network provision.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>

## Appendix 3 Development Priorities

Residential Masterplan Sites	Bellshill Road South, Uddingston	<ul style="list-style-type: none"> <li>• A residential masterplan for the site be brought forward, the scope of which to be agreed with the Council, to demonstrate how the proposed land uses would integrate with adjoining land uses.</li> <li>• Resolve access and transport issues.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> <li>• Ensure green network provision.</li> </ul>
	Bothwellbank Farm, Bothwell	<ul style="list-style-type: none"> <li>• Residential development that takes account of the character of Bothwell and the setting of the adjacent uses.</li> <li>• Site should provide a robust settlement edge which will include a combination of open space, structural planting and footpath networks.</li> <li>• Contribution to the upgrading of Wooddean Park.</li> <li>• No adverse impact on adjacent SSSI.</li> <li>• Resolve access and transport issues</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Shott Farm, Blantyre	<ul style="list-style-type: none"> <li>• Residential development that takes account of the character and setting of Blantyre.</li> <li>• Site should provide a robust settlement edge which will include a combination of open space, structural planting and footpath networks</li> <li>• Resolve access and transport issues.</li> <li>• Resolve issues with overhead pylons.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Strathaven West	<ul style="list-style-type: none"> <li>• Residential development that takes account of the character of Strathaven and the setting of the adjacent uses.</li> <li>• Site should provide a robust settlement edge which will include a combination of open space, structural planting and footpath networks.</li> <li>• Resolve access and transport issues including access to the A71.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Peel Road, Thorntonhall	<ul style="list-style-type: none"> <li>• Site should provide a robust settlement edge which will include a combination of open space, structural planting and footpath networks.</li> <li>• No development in floodplain.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> <li>• Seek contribution to local facilities.</li> </ul>
	Gilbertfield, Cambuslang	<ul style="list-style-type: none"> <li>• Mixed tenure housing development linked to adjacent Cairns housing area.</li> <li>• Site should provide a robust settlement edge through a clearly defined buffer zone which will include a combination of open space, structural planting and footpath networks.</li> </ul>

## Appendix 3 Development Priorities

		<ul style="list-style-type: none"> <li>● Provision of housing types to accord with SLLDP policies including affordable housing.</li> <li>● Seek contribution to local facilities.</li> </ul>
	Lightburn Road, Cambuslang	<ul style="list-style-type: none"> <li>● Provision of housing types to accord with SLLDP policies including affordable housing.</li> <li>● Ensure development takes account of the high pressure gas pipeline and its buffer.</li> <li>● Site should provide a robust settlement edge which will include a combination of open space, structural planting and footpath networks. .</li> <li>● Any development must take account of the footpath linking Lightburn Road to Gilbertfield Road.</li> <li>● Any development must take account of the water course running through the site.</li> <li>● Seek contribution to local facilities.</li> </ul>
	Edinburgh Road Biggar	<ul style="list-style-type: none"> <li>● Residential development that takes account of the character of Biggar and the setting of the adjacent uses</li> <li>● Enhance existing woodland habitat.</li> <li>● The masterplan should address landscape design considerations and specifically define the northern extent of the development.</li> <li>● Site should provide a robust settlement which will include a combination of open space, structural planting and footpath networks.</li> <li>● Provision of housing types to accord with SLLDP policies including affordable housing.</li> <li>● Contribution to education provision</li> </ul>
	Upper Braidwood	<ul style="list-style-type: none"> <li>● In the event of residential redevelopment proposals coming forward the Council will discourage piecemeal proposals and seek a comprehensive and co-ordinated approach to the servicing and development of access and drainage in the area.</li> <li>● Provision of housing types to accord with SLLDP policies including affordable housing.</li> <li>● Ensure green network provision</li> </ul>
	Birkwood Hospital Lesmahagow	<ul style="list-style-type: none"> <li>● Residential and employment generating uses that respect the natural and built heritage qualities of the site.</li> <li>● Provision of housing types to accord with LDP policies including affordable housing.</li> <li>● Ensure green network provision</li> </ul>
	Braidwood House, Braidwood	<ul style="list-style-type: none"> <li>● Development of a care village comprising care home, amenity housing and sheltered/very sheltered accommodation.</li> <li>● Development should respect the landscape setting of the site and include proposals for open space, structural planting and footpath networks</li> </ul>

## Appendix 3 Development Priorities

		<ul style="list-style-type: none"> <li>• Restoration and maintenance of the wooded policies</li> <li>• Re-use of Braidwood House for community or administrative uses</li> <li>• Principal access to the site to be from Braidwood Road with a secondary emergency access from Bushelhead Road</li> </ul>
	James Street Carluke	<ul style="list-style-type: none"> <li>• Mixed uses including residential development of gap sites, vacant yards and properties with redevelopment potential adjacent to Carluke town centre.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
	Manse Road Forth	<ul style="list-style-type: none"> <li>• Residential development</li> <li>• Vehicular access and pedestrian links to the village centre</li> <li>• Site should provide a robust settlement edge which will include a combination of open space, structural planting and footpath networks. Resolve any land assembly issues.</li> <li>• Provision of housing types to accord with SLLDP policies including affordable housing.</li> </ul>
Primary Schools Modernisation Programme	Primary schools across South Lanarkshire.	An updated programme is available on the Council's website <a href="http://www.southlanarkshire.gov.uk">www.southlanarkshire.gov.uk</a> following the links through Education Resources to the Schools Modernisation Programme.
