General Notes

- Prior to commencement of any work on site, protective fencing must be erected around existing trees to be retained in accordance with BS 5837:(2012).
- Prior to any deep cultivation or excavation of planting pits the landscape contractor must check with the site manager / engineer for exact locations of any underground services.
- Some tree positions may have to be amended to accommodate any amendments to locations of services.
- For information on surface materials & details of hard landscape features such as walls & fences refer to architect's drawings.
- For information on levels & drainage refer to engineer's drawings.
- Limited information with regard to levels, drainage & underground services was available to us at time of preparation of drawing.
- For Planting Notes and Maintenance & Management Proposals refer to separate A4 document.
