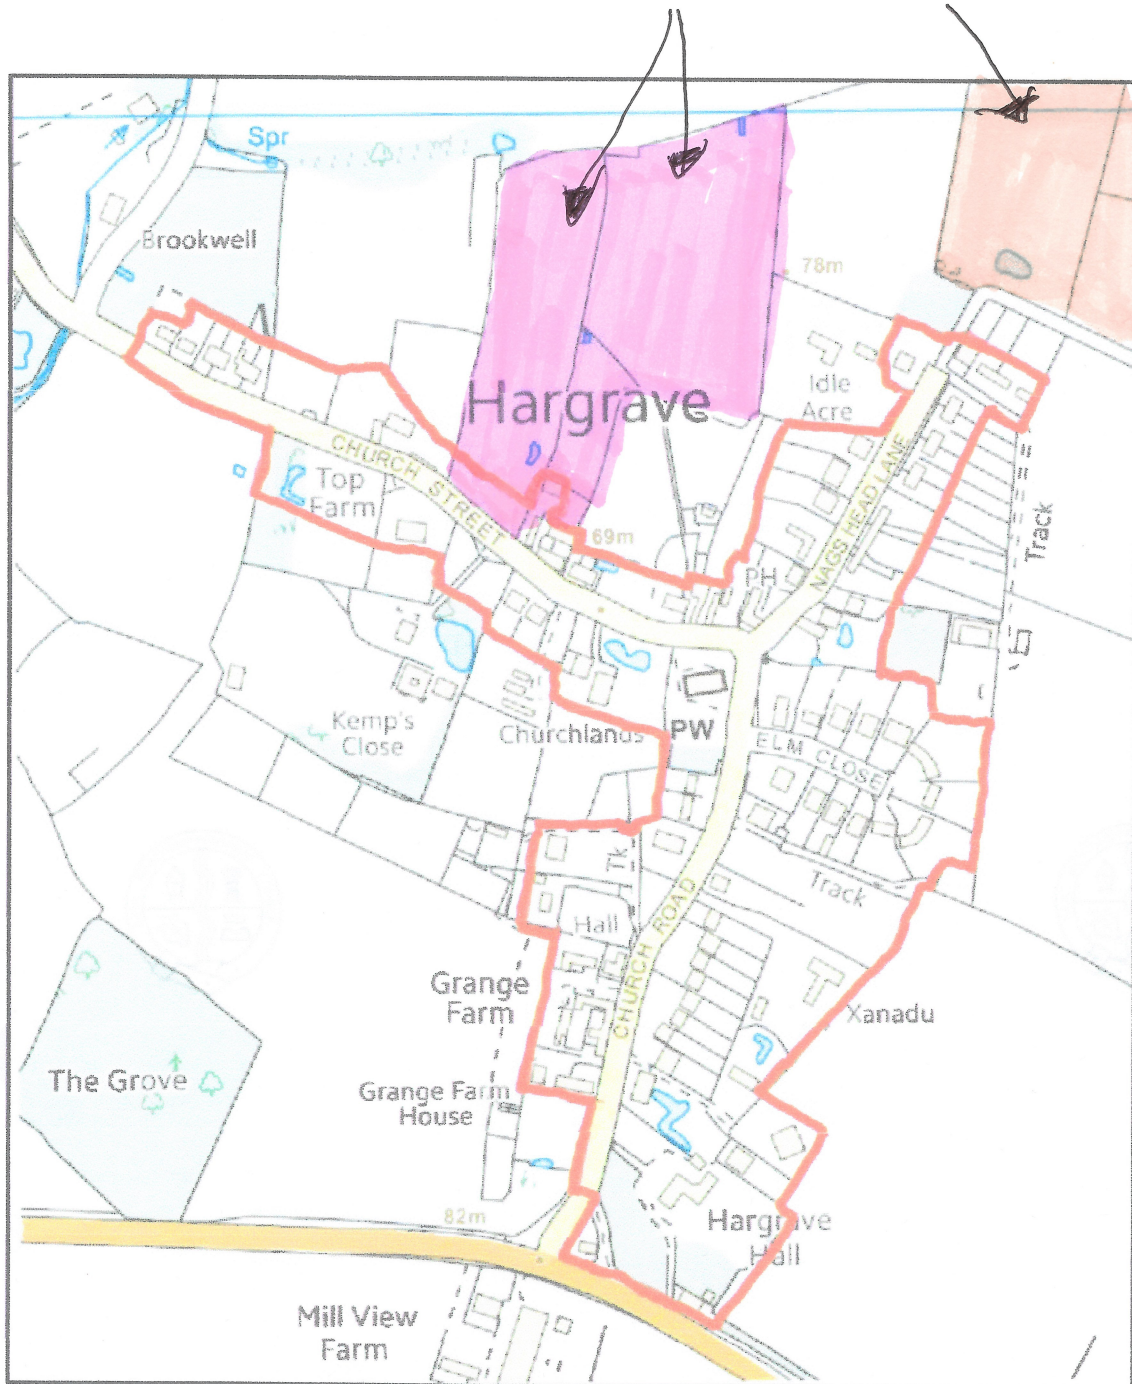

Figure 2 - Proposed settlement boundary

20. This proposed settlement boundary has been carefully considered to reflect the views of the residents of Hargrave, containing room for roadside development of between 10-20 properties. The survey results are clear that when considering the next 25 years, 49% of the village respondents do not favour *any* further development, whilst 23% favoured development of 5 - 10 dwellings and 18% favoured an increase of up to 25 properties. The overwhelming number of residents (96%) like the pattern of roadside development, and 82% would like the current pattern to continue.
