### **Cheddar 2 Reservoir and Transfer Project**

To The Parish Clerk,

The Public Consultation for the Cheddar 2 Reservoir and Transfer Project will run from **3 September to 1 October 2025**.

As we face the challenges of climate change and a growing population, we must find new and sustainable ways to secure our water supply while protecting the environment.

To help us plan for the future, West Country Water and Environment, a group including Bournemouth Water, Bristol Water, South West Water and Wessex Water, will deliver the Cheddar 2 Reservoir and Transfer Project.

The Cheddar 2 Reservoir and Transfer Project is a large-scale water supply scheme that will create a new reservoir with approximately 8.2 billion litres of usable storage near the existing reservoir and village at Cheddar. The new reservoir will be filled with water from the River Axe and Cheddar Yeo, helping to meet rising demand for water in the South West during dry conditions. Supported by new pipelines and an increased water treatment works capacity it will deliver clean and reliable water to where it is needed most. It will also help us protect the environment by reducing the amount of water currently taken from rivers during a drought, supporting river flows and protecting sensitive habitats.

We are holding a consultation to share our latest proposals for the project and how they might affect you. This is an opportunity for you to learn more about the project and tell us what you think about our proposals.

There are several ways you can find out more about the project:

- Visit our website [www.westcountrywaterandenvironment.org](http://www.westcountrywaterandenvironment.org)
- Attend one of our drop-in events in person (more information below)
- Visit one of our deposit locations where copies of the consultation documents will be available to view and take away (more information below)
- Ask us a question via email at [CheddarSRO@westcountrywaterandenvironment.org](mailto:CheddarSRO@westcountrywaterandenvironment.org)
