

## Options for improvements on BPC land

When considering options the following parameters have been applied:

- Cost effective to install and maintain.
- Options based on community feedback.
- 10m buffer maintained for vehicle access.
- Space left for additional amenities if they become available.

### Easy improvement options which can be considered.

- Hardwood logs which can be used as 'stepping stones' for children, goal posts and low seating.
- Sparse tree planting to introduce shade and increase biodiversity. Planting of orchard varieties would also improve amenity for the site, enabling foraging.
- Seed planting and reduced mowing of small patches to create wildflower meadows.
- Allocated well mown areas for ball games.
- Log piles/insect hotels.
