

## Atlantic Rest Natural Burial - Memorial Plaques.

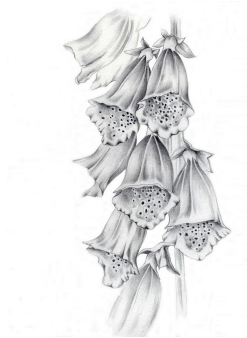

After having had some form of marker requested several times now, we decided to allow a biodegradable marker. It sits flush with ground level at the head of a grave plot.

This is a locally sourced 'tree trunk slice'. Using laser technology the first and last name of those resting at Penlow is engraved. We allow the year of birth and the year of death. These plaques are supplied by a local shop in Bude.

As you can see from the photo below - the idea is to mark the grave but keep it very simple. We keep a standard among all plaques so there are not any that are 'better' than any other. They are all the same as in name, two years and a flower or animal.

There are 7 drawings to choose from:

- Foxglove
- Hare
- Birds
- Primula
- Sheep
- Brimstone Butterfly
- Bumble Bee

These are all species of plant and animal that are regularly spotted at Penlow.

The plaques are not intended to be a permanent feature. At this stage we aren't certain how long it will take for them to return to the earth; but they will be expected to last between 5 - 10 years, and are stained using an environmentally friendly wood preserver.

If you would like to purchase a memorial plaque - the cost is £50.

Thank you.
