13	When I was a student I used all the services libraries provided and they were very important when it came to my success. I would say both for the resources but also as a peaceful place for me to work (I guess I could have been considered a mature student!). When I have my first child this year I know I will use our local library again for books for them as they age so quickly! I would also hope to have some fun sessions put on by the library for them to attend and maybe even a place for support groups, presentations on issues such as climate change etc. that encourage the community to work together on important issues - instead of in isolation.	1/20/2020 4:46 PM
