Further Communication - Street Lighting Stonehaven

Dear Councillor Black

I refer to your correspondence in which you asked about an update on street lighting repairs in Stonehaven.

We spoke with local road colleagues who stated that with regards to all/any the cable faults there are no changes from our December correspondence. Evan Street lighting column has now been cut down/made safe.

Mearns Drive – J055 – Currently still has Additional Work Required, no update currently due to limited resources.

Martin Avenue Hammerhead – 632489 -A job has been raised and work orders committed, but due to this being a singular lighting fixture we do not have a date for it being attended to.

Ramsay Road – A job has been raised for the lighting issues here. Replacement Head Required. Water Ingress from eye, no estimated timeframes for this work.

The team also wish to note that you can get updates on the current lighting issues by using the online defect reporting tool, as any that are resolved/fixed are automatically removed from the system using this, and thus you can inspect the current status of the faults through the map on there.

We hope we have answered your enquiry adequately. if you have any further questions regarding this matter, please do not hesitate to contact us. If you wish to further discuss this matter please use the enquiry number located in the email subject line.

Regards,
