

HIGHLAND GEOLOGICAL SOCIETY MAP COLLECTION

ACCESS

The map collection is made up of items donated by several members or former members. In many cases they are standard folded maps produced by the BGS or predecessors. However quite a lot of the maps have been folded in non-standard ways, mounted on linen, or rolled. Some of these latter are quite fragile.

The Committee has decided that in view of the varying formats and fragility of the collection the maps will not be added to the Society Library which is held in the public library in Inverness. Instead they will be held by members Ann and Peter Reynolds who have sorted, labelled and listed them.

Members of the Society can borrow the maps for any reasonable length of time. Any member wishing to borrow a map should contact Ann or Peter in order to make arrangements for delivery and return. This could be by meeting at evening lectures or field trips, by personal visit, or by post. In the case of using the post the member borrowing the map will be responsible for postage in both directions – this will not be a cheap option!
